(URM-162410) Synchronize Changes from Community Zone Job - Removed from Monitor Jobs - **should be removed from RN**

August 2022 Resource Management

Idea Exchange

Synchronize Changes from a Community Zone job is an internal system process for updating the Institution Zone with relevant changes from the Community Zone.

Synchronize Changes from a Community Zone job has been removed from Monitor Jobs as it is a technically internal system job, the business results of this job should be monitored via the dedicated task lists:

1. For Community Zone Authority updates please use the Authority Control Task List:
[https://knowledge.exlibrisgroup.com/Alma/Product_Documentation/010Alma_Online_Help_\(English\)/Metadata_Management/060Working_with_Authority_Records/010Using_the_Authority_Control_Task_List](https://knowledge.exlibrisgroup.com/Alma/Product_Documentation/010Alma_Online_Help_(English)/Metadata_Management/060Working_with_Authority_Records/010Using_the_Authority_Control_Task_List)
2. For Community Zone Knowledge Base updates of electronic resources please use Community Zone Update Task List:
[https://knowledge.exlibrisgroup.com/Alma/Product_Documentation/010Alma_Online_Help_\(English\)/Electronic_Resource_Management/020_Working_with_Community_Zone_Electronic_Resources/030Working_with_the_Community_Zone_Updates_Task_List](https://knowledge.exlibrisgroup.com/Alma/Product_Documentation/010Alma_Online_Help_(English)/Electronic_Resource_Management/020_Working_with_Community_Zone_Electronic_Resources/030Working_with_the_Community_Zone_Updates_Task_List)

A library can see the date on which the Institution was updated from the Community Zone in the Alma Help menu.

(URM-132279, URM-169957) Proquest Ebook Central Upload Electronic Holdings - Addition of **Public Access Model** Information - **should be removed from RN**

August 2022 Resource Management

Proquest Ebook Central Upload Electronic Holdings integration now includes information regarding the Access Model associated with the electronic resources.

The access model information passed from Ebook Central is only passed for **Owned** titles.

The Access Model information passed from Ebook Central is reflected within the **Public Access Model** field of the electronic portfolio.

The **Public Access Model** field reflects aggregated information regarding the portfolio's Access model, see table below which reflects the Access Model in Alma and in Ebook Central:

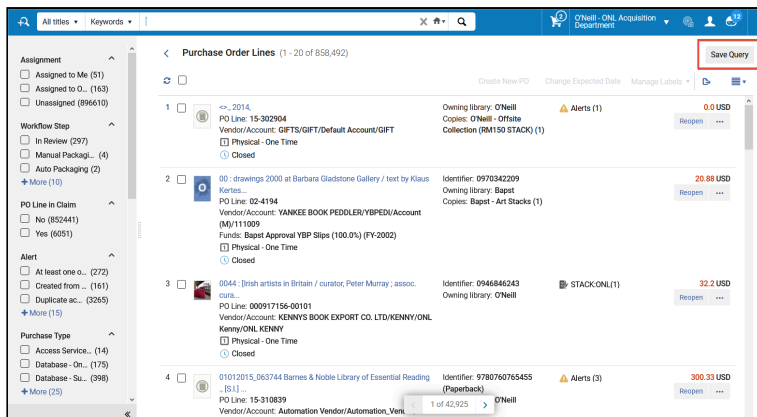

Scenario	Ebook Central	Public access model presented on the portfolio in Alma
1	Title has access model 1U	1U
2	Title has access model 2x1U	2U
3	Title has access model 2x1U and 3U	5U
4	Title has access model 2x1U and 3U and NL	NL (5U once the NL is over)
5	Title has access model 2x1U and 3U and UA	UA

Any new public access model code and description are added to the **Access Model** configuration screen ([Configuration > Acquisitions > Access Model](#)).

(URM-154263) Usability Improvement to PO Line Workflows - Support Save Query

August 2022 Acquisitions

Alma now incorporates the **Save Query** button in the PO Lines list. This improvement enables users to; 1) Run an advanced search, 2) Save the query, and 3) Enter the saved set, see the results, open the advanced search and see the chosen criteria.

Save Query button

Note

The "Set Content Type" is changed from **PO lines** to **Order lines** in advanced search and saved queries.

(URM-109753) Added "OR" Boolean Operator to PO Lines Advanced Search Indexes

August 2022 Acquisitions

Alma enhances the capability of the PO line advanced search by adding the "OR" boolean operator. The added boolean operator enables Alma's advanced searches to be more consistent with other search values. For instance, previously in Alma, advanced searches for **All titles** enabled users to select both "AND" and "OR" boolean operators, whereas only the "AND" operator was available for **Order line** advanced searches.

The screenshot displays the Alma search interface. At the top, the search scope is set to 'All titles' (highlighted with a red box) and the zone is 'Institution'. Below this, there are three search criteria for 'All titles': 'Accompanying Material' (Contains Keywords), 'Keywords' (Contains Keywords), and 'dc:language' (Equals, value: Abkhaz). Each criterion has a dropdown menu for the boolean operator, with 'AND' and 'OR' options visible (the 'OR' option is highlighted with a red box). Below this section, the search scope is set to 'Order lines'. There are three search criteria for 'Order lines': 'Title' (Contains Keywords, value: art), 'Access Model' (Equals, value: One concurrent User (1U)), and 'Workflow' (Equals, value: Auto Packaging). Each criterion has a dropdown menu for the boolean operator, with 'AND' and 'OR' options visible (the 'AND' option is highlighted with a red box). At the bottom right, there are 'Clear form' and 'Search' buttons.

PO Line Search Index Operators
