
3rd Party App Allowed List

- **Product:** campus
- **Operating system:** iOS, Android

Both Apple and Google require the submission of a set of allowed list definitions that identify 3rd party apps that campusM could be linked out to. This is to prevent malicious linking that could be used to compromise the data privacy and security on the user's device.

The following identifies the 3rd party apps that are on the allowed list by default for the campusM native apps.

Note

Note that each platform uses different identifiers.

Defaults for the iOS App

App/Platform	Allowed List Identifier
Facebook	fb
Twitter	twitter
Instagram	instagram
YouTube	vnd.youtube,youtube
Blackboard	bbinstructor,bblearn,bbstudent,blackboard
Canvas	canvas,canvas-courses
Moodle	moodlemobile
Microsoft Outlook	ms-outlook

App/Platform	Allowed List Identifier
Microsoft OneDrive	ms-onedrive
Microsoft Team	msteams
Microsoft Skype for Business	ms-sfb
Zoom	zoomus
Maze Maps	Mazemap
Google Mail (gMail)	googlegmail

Defaults for the Android App

App/Platform	Allowed List Identifier
Facebook	com.facebook.katana
Twitter	com.twitter.android,com
Instagram	com.instagram.android
YouTube	google.android.youtube
Blackboard	com.blackboard.android.bbstudent com.blackboard.mobileorder com.blackboard.android.bbstructor
Canvas	com.instructure.candroid com.instructure.teacher

App/Platform	Allowed List Identifier
Moodle	om.moodle.moodlemobile
Microsoft Outlook	com.microsoft.office.outlook
Microsoft OneDrive	com.microsoft.skydrive
Microsoft Team	com.microsoft.teams
Microsoft Skype for Business	com.microsoft.office.lync15
Zoom	com.us.zoom.videomeetings
Maze Maps	no.trt.ivecto.androidclient.mazemap
WorkDay	com.workday.workdroidapp
Google Mail (gMail)	com.google.android.gm
Google Calendar	com.google.android.calendar
MS Authenticator App	com.azure.authenticator
Flickr	com.yahoo.mobile.client.android.flickr

Updating Your Allowed Lists

If you want to be able to link to a 3rd party app from your native campusM app that is not listed above, then you will need to open a support ticket to request the app identifier to be added to the allowed list manifest. This is updated at build time, so you will need a new build for the allowed list to be active. Until this is updated, the app will not link out to the 3rd party app.
