

What and where is the License ID?

- **Product:** Alma
-

Question

What is the License ID? Where can I find it?

Answer

Unfortunately, the License ID is not visible in Alma from either the License Details page or the Electronic Portfolio Editor or collection. The system ID of the license can only be seen in Analytics. This field is the unique identifier of the license that the electronic portfolio or collection is associated with.

If you search for a specific portfolio in Analytics and add the Portfolio License/License ID field you will see this id. If you search for this Portfolio License ID in Alma, the search results will include all portfolios that are associated with this license.
