

WorldCat as an external resource

- **Product:** Alma
-

Description

We want to add WorldCat as an external resource. There are three resource:

- OCLC WorldCat (through Libraries Australia)
- WorldCat (fsz3950)
- WorldCat (OCLC)

Which one shall we use?

Resolution

"WorldCat (fsz3950)" was added for customers in China, as there are problems accessing the standard WorldCat server from China.

If you are not based in Australia or China, then you should use the resource "WorldCat (OCLC)".
