

If can't Delete Invoice, Delete Line button is missing on invoice

- **Product:** Voyager
 - **Product Version:** all
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Symptoms

If an operator can Add/Update Invoices but does not have permission to Delete Invoices, they won't see the Delete Line button on an invoice

Defect Status

VYG-8037 is currently in Development

Replication Steps

- # Create an Acquisitions Security Profile that has options to Add/Update Invoices, but does **not** have permission to Delete Invoices (both options on the Profile Values Cont. tab)
- # Create a new operator and move them into that profile
- # Find or create invoice that has a line item and is not yet approved
- # Note the gap between the 'Add Line from Order' button and Quick Line Item button on this invoice
- # Log in as an operator that **does** have the Delete Invoices option checked off -- the button appear for this same invoice

Workaround

Highlight the line item then go to Line Item>Delete, or highlight the line item and click Save (the Delete Line button will then display)
