

## Gale Research Complete GRC E

- **Product:** Alma, 360 KB, SFX
  - **Product Version:** all
  - **Relevant for Installation Type:** all
- 

## How do I implement the Gale Research Complete E/GRC E bundle in Ex Libris products?

Gale Research Complete offers academic institutions a deep well of content, including proprietary databases, award-winning eBooks, scholarly articles, and rare primary sources that enhance research, learning, and discovery at the university level and beyond.

This article is about the **GRC E** version of the Gale Research Complete product.

Because Gale Research Complete is a bundle of various Gale products, it is not possible to create a single collection to make it work as expected across Ex Libris products. Because of this, libraries who have a subscription to Gale Research Complete should select/activate collections as indicated in the spreadsheet below. The spreadsheet contains all of the collections and their Alma, 360 KB, and SFX details.

[Gale Research Complete \(GRC E\) Ex Libris Collections list](#)

**Note on the Archives Unbound collections activation options:** To make GRC activation for Archives Unbound easier, we will be adding a "Gale Research Complete GRC-E - Archives Unbound" collection as a "one activation" option if you choose (this page and the spreadsheet will be updated once this is available to activate in Q2 2025). This one activation will enable Archives Unbound content in the Central Discovery Index, once all Archives Unbound collections have been loaded into CDI later in 2025. However, the individual Archives Unbound collections are also included in the spreadsheet, if you prefer to activate them separately.
