

Risk Identifiers

A Risk Identifier flags a perceived risk to the viability of a format. The risk may be a result of a format or format parameter becoming deprecated or obsolete (property- or tool-driven).

Risk Identifiers can be added to formats as describes in [Risk Identifiers](#) and [Managing Local Risk identifiers](#).

This section describes the Risk Identifiers library. From this area you can view the existing risk identifiers, add new risk identifiers, and add formats to risk identifiers.

Viewing the List of Risk Identifiers

You open the Risk Identifiers page by clicking Risk Identifiers (**Preservation > Format Library > Risk Identifiers**):

Name	Risk Identifier	Risk Type	Format	View	Edit	Delete
1 x8G	OwO	PROPERTY_DRIVEN	ExL-Fmt-9	View	Edit	Delete
2 risk_25a	risk_25a description	PROPERTY_DRIVEN	ExL-Fmt-21, ExL-Fmt-23	View	Edit	Delete
3 risk_25a	risk_25a description	PROPERTY_DRIVEN	ExL-Fmt-21, ExL-Fmt-23	View	Edit	Delete
4 RTF_CONTROLWORD_ERROR...	RTF Controlword Error	TOOL_DRIVEN	fmt/45	View	Edit	Delete
5 RTF_CHARSET_ERROR_45	RTF Charset Error	TOOL_DRIVEN	fmt/45	View	Edit	Delete
6 RTF_CONTROLWORD_ERROR...	RTF Controlword Error	TOOL_DRIVEN	fmt/46	View	Edit	Delete
7 RTF_CHARSET_ERROR_46	RTF Charset Error	TOOL_DRIVEN	fmt/46	View	Edit	Delete
8 RTF_CHARSET_ERROR_47	RTF Charset Error	TOOL_DRIVEN	fmt/47	View	Edit	Delete
9 RTF_CONTROLWORD_ERROR...	RTF Controlword Error	TOOL_DRIVEN	fmt/47	View	Edit	Delete
10 RTF_CHARSET_ERROR_48	RTF Charset Error	TOOL_DRIVEN	fmt/48	View	Edit	Delete

List of Risk Identifiers

The Risk Identifiers page displays information about the risk identifiers configured in Rosetta, including The name, a description, and, the risk type of the risk identifier and the formats with which it is associated. You can view, edit, and delete risk identifiers.

Note

Editing risk identifiers is only possible in the global format library.

Adding Risk Identifiers

You can add risk identifiers to Rosetta and add related formats to the risk identifiers in the same way you can from the Related Identifiers tab for a format. For information, see [Managing Local Risk identifiers](#).
