

Delivery Metadata Fields

Delivery Metadata Fields

Deposit Managers can define what metadata will be displayed for other users from the IE Metadata and File Metadata sections of the Metadata Delivery Fields page. With the Share URL Field section, you determine from which field Rosetta viewers take the URL when the user clicks the Share icon in the viewer. To reach this page, follow the path **Deposits > Advanced Tools > Delivery Metadata Fields**.

Deposits: Delivery Metadata Fields

Category	Selected Items	Action	Field Name	Action
IE Metadata	267 items selected	Remove all		Add all
	Abstract	-	delivery.IE.dcterms.accrualMethod	+
	Abstract - CMS	-	delivery.IE.dcterms.accrualMethod - CMS	+

Delivery Metadata Fields

To add or remove delivery metadata fields, simply drag and drop the requested field in the left side of the multi-select widget. You can drag the fields to reorder them. The order the fields appear on this page are the order they appear in Rosetta.
