

## File Comparison

---

### File Comparison

File comparison plug-ins receive two files and return a value that can be used as part of a preservation evaluation.

---

### Plug-in Parameters

Depending on the specific implementation, a plug-in may or may not require parameters. If the plug-in does require parameters, they are populated in the installation of a new instance of the plug-in.

---

### Usage

The plug-in receives two files (original and migrated) and returns a decimal value that can be used as part of a preservation evaluation. On failure it returns -1.
