

E-mail Notifications

E-mail Notifications for Deposit Activity

Rosetta e-mails a report on deposit activity for a given Producer's account when two conditions are met:

1. The Producer or a Negotiator registers the Producer and signs the Producer up to receive regular reports. This condition is met when a Producer self-registers or when a Negotiator registers a Producer. See [Add Producer Account Process](#).
2. A Negotiator activates these reports from the back office and sets the start date and the frequency for all Producer reports in the system. See [Modifying the Producer Report Job](#).

Digital Signature

To use a digital signature on e-mail communications, set up the feature as follows:

Obtain the certificate through an external certificate of authority (CA).

Copy the certificate to Rosetta deposit server. Configure the following parameters:

- `digital_certificate`: the location of the certificate
- `digital_certificate_password`: the password for the certificate
- `digital_signature`: flag to turn on/off the digital signature

Name	Description	Type	Module	Value
<code>http_auth_orig_path</code>	The HTTP header parameter X-ORIG-OPTION is configured to be SAMEORIGIN to prevent click-jacking attacks	boolean	general	false
<code>collector_show_id</code>	Displays the Collector ID alongside the collection name in the collection tree (Collection management and Search)	boolean	general	false
<code>digital_certificate</code>	Name of the digital certificate file used for email signing. Stored in the operational shared directory	string	general	<code>digital_certificate</code>
<code>digital_certificate_password</code>	Password of the digital certificate used for email signing	string	general	<code>Password</code>
<code>digital_signature</code>	Use of digital certificate to sign emails is permitted	string	general	<code>true</code>
<code>additional_additional_namespaces</code>	Additional Dublin Core namespaces for the Web editor	string	general	<code>xmlns:mods="http://www.mods.org/xml/2003/09/xmlns:dc="http://www.dublincore.org/xml/1.1/"</code>
<code>email_regex</code>	Regular expression validation rules for email addresses	string	general	<code>^[a-zA-Z0-9]{1,64}@([a-z0-9]+){1,63}(\.[a-zA-Z0-9]{1,4}){1,16}\$</code>
<code>embedded_mode_session_timeout</code>	Session time out in seconds	number	general	<code>1800</code>
<code>enforce_at_report</code>	Enforces Access Rights during IE report (Search and Web Editor UIs only)	boolean	general	<code>true</code>
<code>help_url</code>	Help page URL	string	general	<code>https://rosetta.exlibrisgroup.com/443</code>
