
Rialto 2025 Roadmap

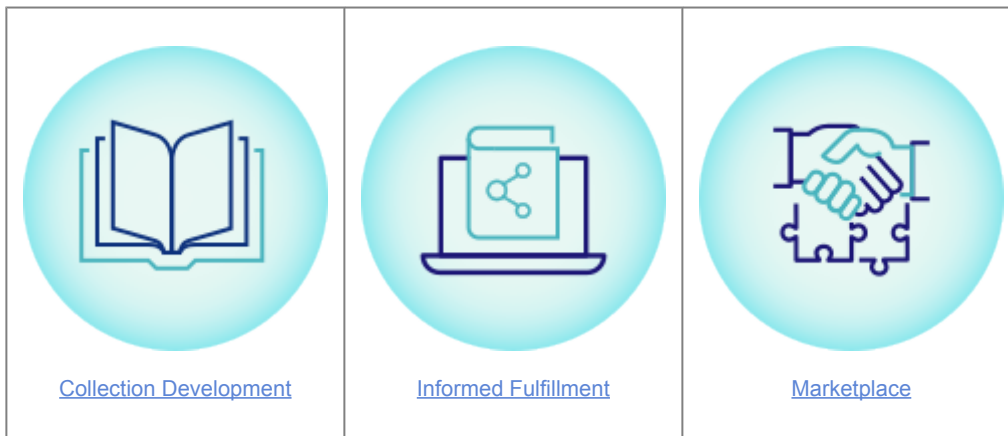

Rialto Roadmap Highlights 2025-2026

The Rialto roadmap is important for Ex Libris as a means to communicate the key Rialto priorities with the Rialto community.

We take pride in the fact that this roadmap was built together with the Rialto community and is based on the community's future strategy for libraries and academic institutions.

Our roadmap places a focus on customer satisfaction. Many of our new and future Rialto developments deal with simplified workflows, improved performance, and UX enhancements. All this is based on feedback received from the Rialto community.

The Rialto roadmap gives a two year future view of the product and the key areas of emphasis. During this period, Rialto developers will continue to add functionality and enhancements to support efficient workflows, collaboration, and a seamless user experience. Follow the links below to see overviews of the various components of our 2025-2026 roadmap. We will continue to update these pages on a quarterly basis to share highlights of upcoming enhancements.
