## Cision Inc Collections Update

### Access Issues with Europresse Collections

Following a recent update to the linking structure for Europresse/Cision Inc. collections, customers are experiencing significant access issues.

After discussion with the provider, we will revert to the original Customer ID-based access method.

### Affected Collections

Collection Name	Collection ID	DBID	Status
Bacon Europresse France Bibpub	61434000000000814		Customer ID field available
Bacon Europresse Global Bibesr	61434000000000815		Customer ID field available
Eureka	61247000000000037	RZL	Customer ID field will be available after July 20th CKB update
EUREKA Academic Library	61368000000000038	PV9	Customer ID field will be available after July 20th CKB update

### Resolution Plan

- The Customer ID field will be re-established in the linking configuration.
- The service will be updated to use the Customer ID in the access URLs.
- The provider has sent an updated title list which will be part of our upcoming updates

### Customer Action Required

To ensure uninterrupted access, please add your Customer ID in the “Additional” tab of the Electronic Collection Editor (see below screenshot).

If you do not have your Customer ID, please contact [benoit.berthier@cision.com](mailto:benoit.berthier@cision.com)

We will update this article once the updated configuration is live. Thank you for your patience and cooperation as we work with Europresse to restore stable access.
