
End user parametrization - list of various parameters

- **Product:** Primo
 - **Product Version:** Primo VE
-

With major contribution by University of Queensland.

Question

What is the conceptual difference between individual user parameters as defined and used within a Primo user session.

Answer

There are 3 groups of user parameters in Primo session:

1. defined and triggered by **URL payload** of specific user action
2. defined within **user preferences** and triggered by user sign-in
3. defined by **Primo UI** and refreshed by timeout or clearing browser history

URL Payload parameters

The selection remains in place upon timeout.

- Expanded search toggle in main Primo
- Search within full text toggle
- “Sort by” results in main Primo
- “Sort by” results in Database/Journal/Browse/Newspapers Search
- “Sort by” results in Collection Discovery
- Unlocked facet selection
- Locked facet selection (this also goes across the browser window, affecting different tabs)
- Search query
- Expanded search toggle in Citation Trail

User Sign-in parameters

Those are reset to default upon timeout of existing user session.

- Number of results per page
- Personalised results
- Advanced Search expanded or collapsed
- Allow search history to be saved

- Allow Research Assistant search history to be saved
- Allow saved search history to be used
- Labels selection in Favourites > Saved items
- Sort by selection in Favourites > Saved items

Primo UI parameters

Those are reset to default upon timeout or by clearing browser history.

- Citation generator selection (reset only by clearing browser history)
- Citation trail disclaimer reappears for Web of Science and Scopus
- Display view back to grid in Collection Discovery
- Citation Finder radio button selection back to Article
- Account > Loans > Borrowing history selection back to Current loans
- “Sort by” in Account > Loans back to no displayed selection
- Expand item display in Account > Loans back to collapsed
- Item checkbox selections for Favourites > Saved items
- Item checkbox selections in search results
- Item level filter selections in Get it
- Expand item display in Get it back to collapsed
