## Primo VE 2026 Release Notes

Information provided in the Release Notes is subject to change. Occasionally, features or fixes described here may be postponed or adjusted based on production schedules or quality considerations as part of our commitment to maintaining product quality and stability.

### Additional Information:

- [CDI-Related Updates](#), below
  - [Release and Maintenance Schedule](#)
  - [Ex Libris Known Issues](#)
- 

---

## May Sneak Preview

- CERV # 28330 – More efficient method for testing discovery normalization rules
- CERV #28360 – Editing the NDE Landing Page via the Alma configuration
- FRBR preferred record – Priority list based on availability
- Research Assistant – Improved display of search filter options
- Map widget – Locations based on Authority's coordinates
- CERV #36385 – Allow Online Services Order to be sorted by current access

---

## Features

---

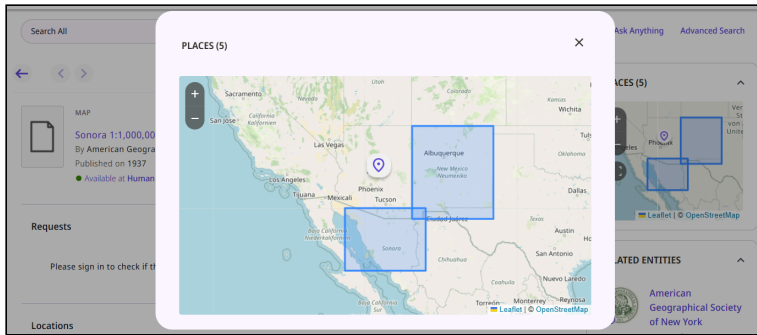

### NDE UI - Enhanced Map Display

#### April 2026

The Places Map widget has been enhanced: The look and feel has been refined, and a new option to open an enlarged version of the map in a pop-up window has been added. To open the enlarged map, select the

button.

### Enlarged Map in a Pop-Up Window

For additional information, see [Overview of the NDE Interface and Configuration](#).

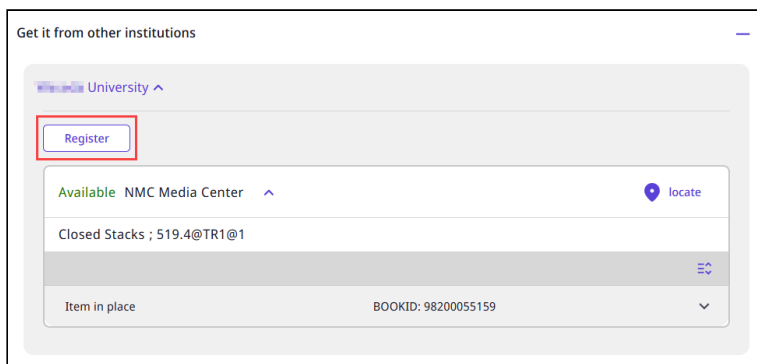

## NDE UI - Register Option for Other Institutions in the Network

### April 2026 - Collaborative Networks

When a patron locates a resource at another institution in the network, the patron must be registered with the other institution in order to request the resource. You can now configure what happens in the NDE UI if they are not yet registered:

- You can choose whether to automatically register patrons from other institutions in the network, or to add a **Register** option in the **Get It from other institutions** section of the Full Display, enabling them to register manually. To do so, set the value of the `uresolver_remote_register` customer setting ([Configuration Menu > Fulfillment > Other Settings](#)) of the institution holding the resource to one of the following: `Auto` to set up automatic registration, or `Manual` to add the **Register** option to the Full Display.

- When you choose to require manual registration, you can also choose to hide the **Register** option from users who cannot register at your institution. To do this, you must create a list of Restricted patrons – user groups whose members cannot register at your institution – in the **Unexposed User Groups** table ([Configuration Menu > User Management > Collaborative Networks > Restricted Users](#)). Then, you must set the value of the `display_register_button_by_restricted_user_groups` customer setting ([Configuration Menu > Discovery > Other > Customer Settings](#)) to `true`.

For additional information, see [Display Functionality](#).

---

## Expanded Options for Selecting the Preferred FRBR Record

March 2026

Primo FRBR now supports defining up to three levels of priority for the selection of the preferred record based on availability:

- **Availability - Digital** – Precedence is given to a record that is available in digital form (ALMA-D) if it is among the highest ranked records in the FRBR group.
- **Availability - Electronic** – Precedence is given to a record that is available in electronic form (ALMA-E) if it is among the highest ranked records in the FRBR group.
- **Availability - Physical** – Precedence is given to a record that is available in physical form (ALMA-P) if it is among the highest ranked records in the FRBR group.

This means the selection of the preferred FRBR record can now be based on five criteria:

- Date - Newest
- Resource Type
- Availability - Digital
- Availability - Electronic
- Availability - Physical

For additional information, see [Configuring Discovery Views for Primo VE](#).

---

## Normalization-Test Records Stored in Primo VE

March 2026

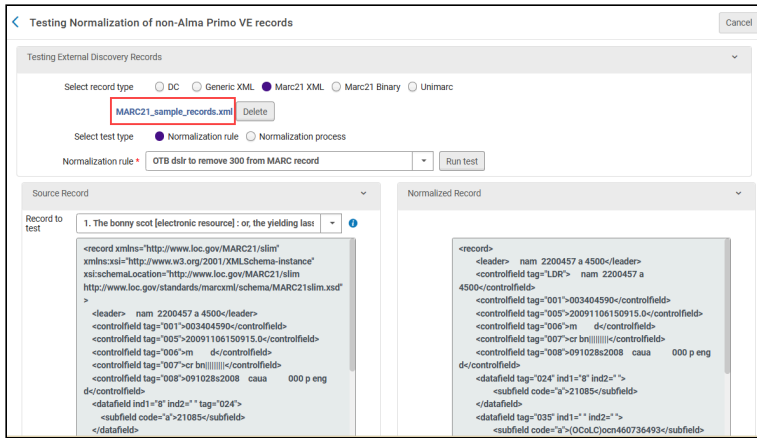

### CERV Enhancement (ID #28330)

Added 18 February, 2026

Test files containing sample records for use when testing normalization rules are now retained by Primo VE after they are uploaded. They remain in the system until they are manually deleted, enabling you to quickly test normalization rules without having to provide sample records each time you want to do so.

A different sample file can be saved in the system for each supported format – DC, Generic XML, Marc21 XML, Marc21 Binary, or Unimarc – and can contain up to 20 sample records. The uploaded records are available for use as test input by all the Primo VE admins in the institution, and the files can be downloaded as well, making it easy for other admins to access them. In order to upload a different file for a particular format, you must first delete the one that is currently loaded.

The testing process is managed in the Testing Normalization of non-Alma Primo VE Records page ([Configuration Menu > Discovery > Loading Records from External Data Sources > Test Normalization Rules](#)).

### Test File Loaded in the *Testing Normalization of non-Alma Primo VE Records* Page

For additional information, see [Testing Normalization Rules for External Data Sources](#).

## Expanded Addata Fields for Dublin Core

March 2026

The PNX of Dublin Core records now includes many more Addata fields. For additional information, see [Mapping to the Display, Facets, and Search Sections in the Primo VE Record](#).

## NDE UI - Enhanced Maps

March 2026

The map in the Full Display has been enhanced. In addition to showing the location of the record itself (when coordinates exist in its metadata), it now also displays the locations of related entities, based on coordinates retrieved from the entities' information.

### Map Widget on Full Display Page

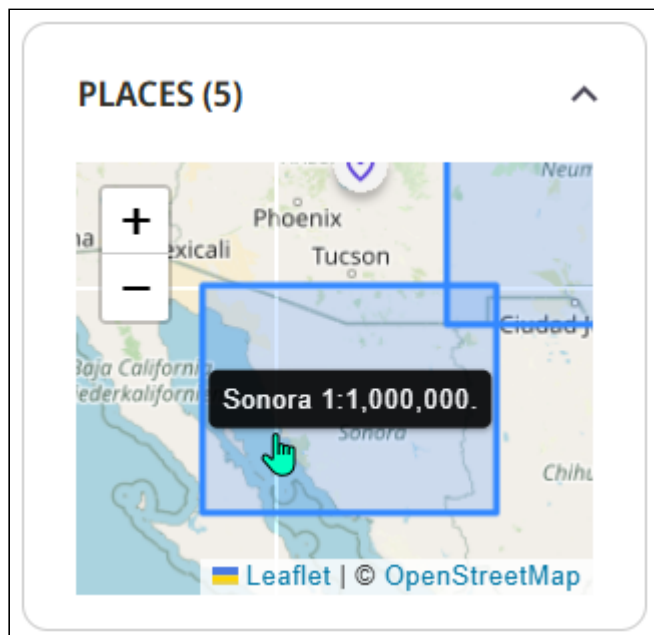

The following markers are used on maps:

- Locations given as two coordinates –
  - Record location –
  - Related-location entity –
  - Related-organization entity –

- Locations given as four coordinates –

Placing the mouse cursor on a marker opens a tooltip indicating which entity the marker represents.

#### Map Marker with Tooltip

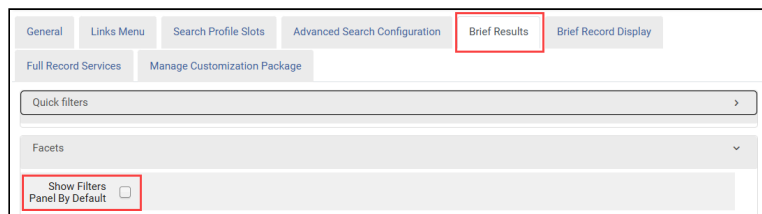

For additional information, see [Overview of the NDE Interface and Configuration](#).

---

## NDE UI - Configuration of the Facets Panel's Initial State

March 2026

For each view in your Primo VE system, you can now choose whether the **Facets** panel of the Brief Results page should be open or closed at the beginning of each user session. By default, the panel is closed. To set it to be open, in the view settings (**Discovery > Display Configuration > Configure Views > Edit (a view)**) in the **Brief Results** tab, under **Facets**, select **Show Filters Panel By Default**.

#### Show Filters Panel By Default Option in the View Settings of an NDE View

---

#### Note

This setting has no effect on the mobile UI.

For additional information, see [Configuring Discovery Views for Primo VE](#).

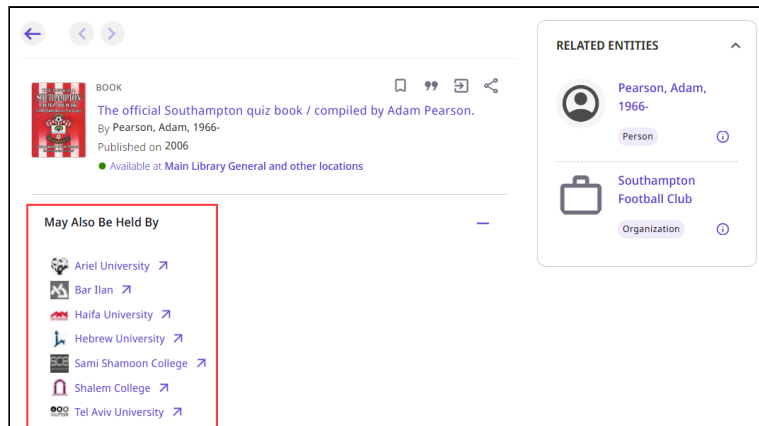

---

## NDE UI - Support for "May Also Be Held By"

February 2026 - Collaborative Networks

The NDE UI now supports the "May Also Be Held By" feature for collaborative networks. When this feature is activated, the Full Display of resources contains a "May also be held by" section whenever the resource's metadata includes links to other institutions, campuses, and libraries that may also provide services for the resource. The section lists the relevant locations, with links to those locations. You can use the customization package to add icons for each of the locations.

### "May Also Be Held By" Section

For additional information, see [Configuring the "May Also Be Held By" Service in Primo VE](#); [NDE UI Customization - Best Practices](#).

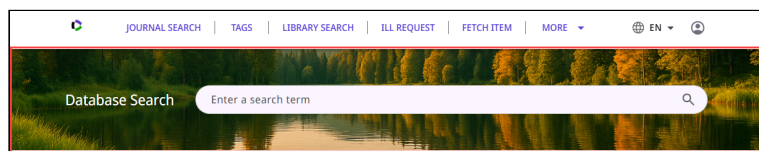

---

## NDE UI - Option to Customize Background Images in Login and Dedicated Search Pages

February 2026

You can now use the customization package to customize the background images that surround the search box in dedicated search pages, such as the Journal Search or the Database Search, and the image that appears in the Login page.

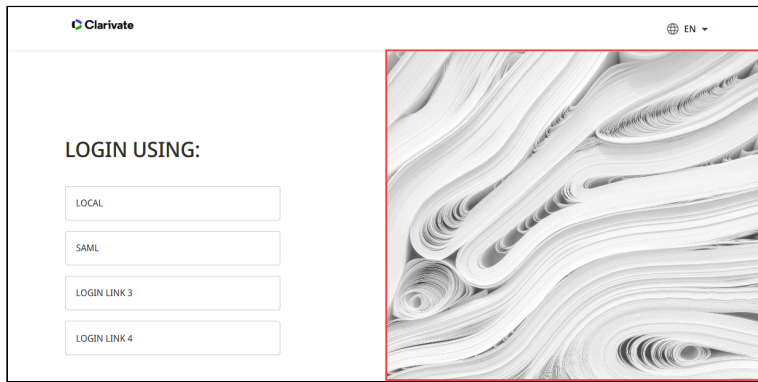

To customize the background image of a dedicated search page, in the customization package, in the `images/header` folder, add a PNG image file for the type of search, with the file name `<resource type>-search-header-img.png`. For example, for the Database search page, add a file called `database-search-header-img.png`. Currently, the background images of the following types of search pages can be customized in this way: Journal search, Browse search, Database search, and Newspaper search.

### Custom Database Search Background Image

When the Login is a full page, you can add a custom image to the page. To do so, in the `images/loginPage` folder, add

a JPG image file with the file name `loginPageImage.jpg`.

### Custom Image on Login Page

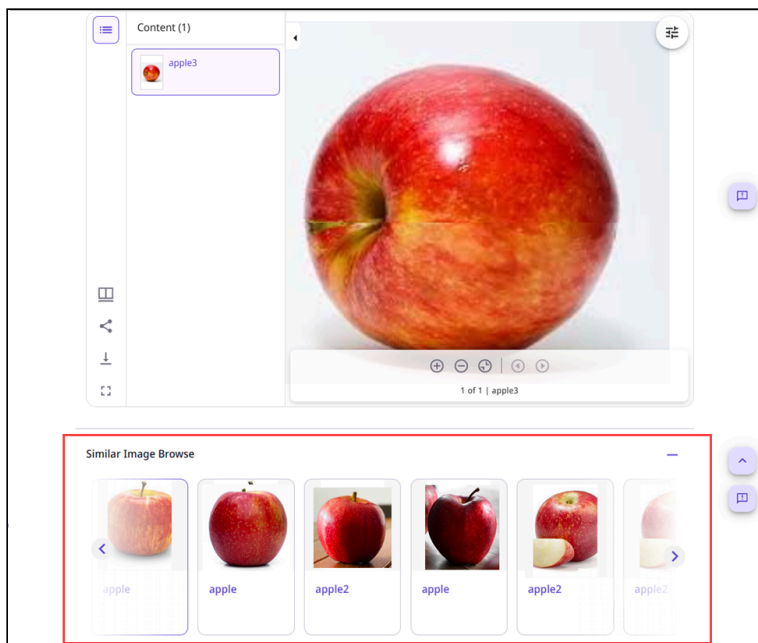

For additional information, see [NDE UI Customization - Best Practices](#).

---

## NDE UI - Similar Image Browse for Digital Images

February 2026

For customers who have purchased Alma Specto, a new section has been added to the Full Display of digital images: *Similar Image Browse*. When enabled, this section presents a selection of images in the institution/network holdings that are deemed similar to the current image. This feature employs the Alma Specto API to find similar images. The images found are displayed in a carousel, in order of the degree of similarity between them and the current image. Selecting one of the images in the carousel opens the Full Display of that image.

### Similar Image Browse Section

In order for this section to appear in the Full Display of an image, the **Enable Similar Image Browse** option must be enabled in the view settings (**Discovery > Display Configuration > Configure Views > [Edit a view] > General tab**) of the view. For additional information, see [Overview of the NDE Interface and Configuration](#), [Configuring Discovery Views for Primo VE](#).

---

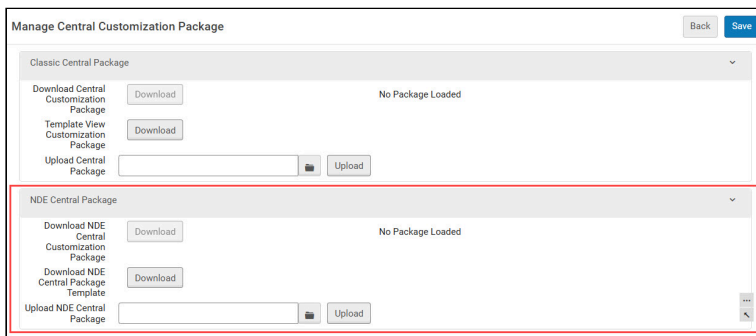

# NDE UI - Central Package for Consortia

February 2026 - Collaborative Networks

The NDE UI now supports central distribution and deployment of customization packages in consortia. This enables consortia to share common UI assets, such as headers and images, so that the members' UIs can have a similar look and feel.

As in the original UI, configuration of the Central Package in the NDE UI is performed in the Network Zone, in the Manage Customization Package page ([Configuration Menu > Discovery > Display Configuration > Manage Customization Package](#)). Configuration for NDE UI Central Packages is similar to that of the original UI, but it is configured separately, so that views based on the original UI are not affected by the configuration of the NDE UI, and vice versa.

## Network-Zone Settings for Configuring the Central Package for NDE Views

Once the NDE Central Package has been uploaded to the Network Zone, it becomes available to member institutions. Each institution can then choose to implement the Central Package in any of their NDE views. They have two options for how to do this:

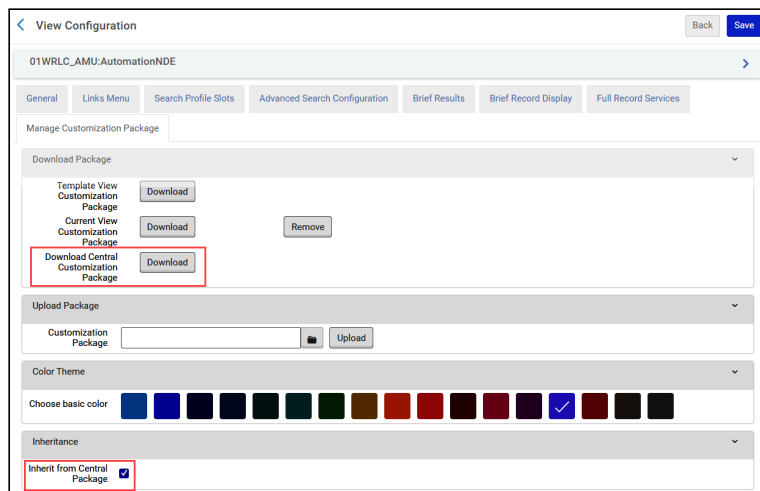

- Use the Central Package as a template for further customizations – Download the central package, modify it as required, and then upload it to the view. In the institution's UI, modifications made by the institution override the settings of the Central Package.
- Adopt the Central Package completely, without modifying it at all – Select the **Inherit from Central Package** option. When this option is selected, any updates that are implemented in the Network Zone in the future are also automatically implemented in the view.

---

### Note

If **Duplicate for NDE** is used to create an NDE view from an existing non-NDE view, the **Inherit from Central Package** setting is not copied, and is not selected. If you want to use this option in the NDE view, you must select it again in its settings.

---

### Customization Settings in the View Configuration Page of an Institution-Zone NDE View

For additional information, see [Central Management in Collaborative Networks](#).

## Improvements to Natural Language Search

January 2026

In the Natural Language Search, we have improved the transformation of the original query into a structured format. Highlights of the improvements include:

- The identification of author names in search queries has been refined to better differentiate authors from subjects. This makes it possible to use them as author filters in query processing, which improves the accuracy of the search results.

---

### Note

Identification of author names in queries relies on the Large Language Model (LLM). While author detection is generally very accurate, detection may not always be successful.

- We added a new mechanism to ensure that terms that are used as filters are not duplicated in the actual Boolean query.
- We enhanced the handling of non-English queries. When a query is identified as being in a language other than English, the resulting Boolean query is generated with three permutations in the (non-English) query language and three permutations in English (because the CDI index is very rich in English content).
- Searches for photos now automatically include the more general resource-type *images*.

For additional information about Natural Language Search in Primo VE, see [Natural Language Search in the NDE UI](#).

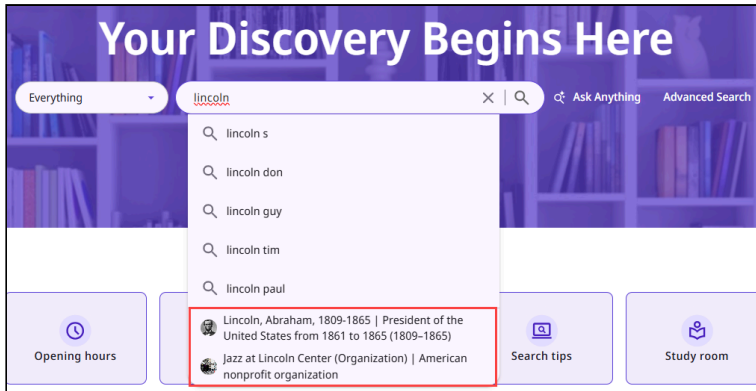

## NDE UI - Linked Open Data - Discovery of Organization and Location Entities

January 2026

The NDE UI now supports the linked-data *organization* and *location* entities. This feature utilizes Linked Open Data (LOD) to enable users to discover additional information regarding an entity and to relate it to materials provided by your library. Currently supported entity types are *person*, *organization*, and *location*. The information about each entity is obtained from the Library of Congress and Wikidata.

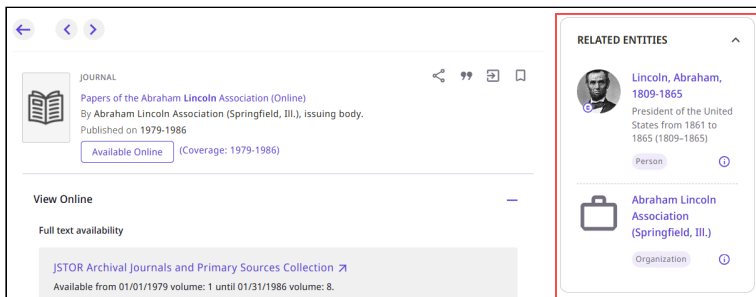

The UI includes the following elements to enable discovery of entities:

- **Autocomplete Entity** – Suggestions of entities related to terms the user enters into a search query. When the user begins to enter a search term, the system identifies possible matches for the term among entities of each type for which LOD information is available, and ranks the suggestions for each type of entity. The top-ranked suggestions appear at the bottom of the autocomplete list; up to two suggestions may appear. When available, the first suggestion is a person and the second suggestion is an organization. Locations only appear if neither persons nor organizations are found.

- **Info Cards** – Brief information about entities related to a record that is open in the Full Display. Info Cards appear on the Full Display page in the Related Entities section of the Recommendations panel. A card showing the same brief description that would appear in an autocomplete suggestion is displayed for each entity that is associated with the record. Selecting the entity's name in a card opens the Entity Page (see below) of that entity.

Up to three entities can appear in the Related Entities section. If more than three entities are associated with the record, a **More related entities** option appears below the Info Cards. Selecting this option opens the full list of related entities in a sliding panel. Up to 40 entities can be included in the list in the sliding panel. Persons are prioritized for the first suggestion, organizations are prioritized for the second suggestion, and locations are prioritized for the third suggestion.

- **Entity Page** – More detailed information about an entity presented in a dedicated page. Entity pages open when an entity is selected in either an autocomplete list or an Info Card.

**New York Philharmonic** Organization  
American symphony orchestra in New York City

The New York Philharmonic is an American symphony orchestra based in New York City. Known officially as the Philharmonic-Symphony Society of New York, Inc., and globally known as the New York Philharmonic Orchestra (NYPO) or the New York Philharmonic-Symphony Orchestra, it is one of the leading American orchestras popularly called the "Big Five". The Philharmonic's home is David Geffen Hall, at New York's Lincoln Center for the Performing Arts. Founded in 1842, the orchestra is one of the oldest musical institutions in the United States and the oldest of the "Big Five" orchestras. Its 14,000th concert was given in December 2004.

## NDE UI - Related Links

### January 2026

Contextual relationships – links to CDI records of resources related to a book – are now included in the Full Display of book records in the NDE UI. Unlike the original UI, the NDE UI includes sections in the Full Display page of a book record for each type of related links available for the book. The following types of related links are supported:

- Chapters of this book
- Reviews of this book
- Other chapters of this book (for book-chapter records)

Links in the general information section of the Full Display indicate how many related links exist. Selecting a link takes the user to the relevant section.

BOOK

**The Palgrave Handbook of Global Politics in the 22nd Century**  
By Horn, Laura;Mert, Ayşem;Müller, Franziska;Mert, Ayşem;Müller, Franziska;Horn, Laura  
Published on 2023

This handbook offers a unique approach to the question: How do scholars write the future of global politics?Written in futur antérieur style, around the 200-year anniversary of the birth of International Relations (IR) as an academic discipline, the...

[Read More](#)

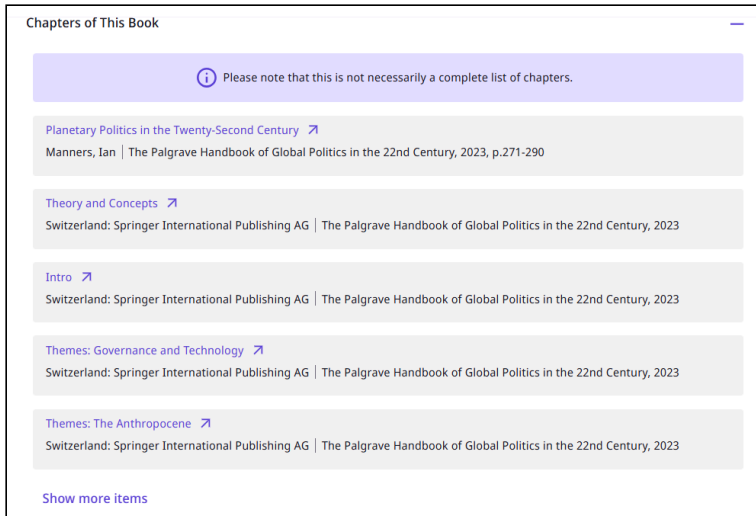

[Check for available services](#)

[Chapters of this book \(35\)](#)

### Link to the Chapters of this Book Section of a Full Display Page of a Book Record

Initially, the first five available related items in the category are listed in the section. Selecting the **Show more items** link below the list adds the next five available related items, and so on, until all of the items are shown.

From the related-links section, users can select an item to view it. The Full Display of the related item then opens in a new tab.

### Chapters of this Book Section in the Full Display Page of a Book Record

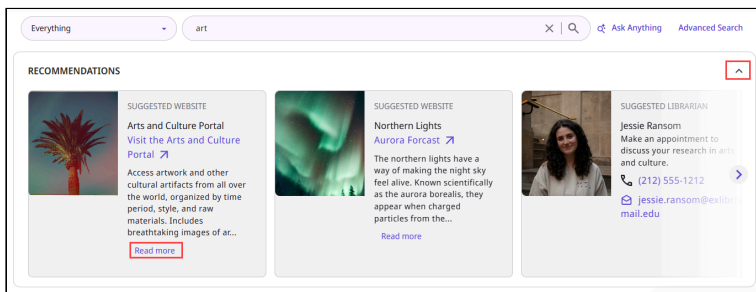

For additional information, see [Configuring Contextual Relationships for Primo VE](#).

## Additional Enhancements

- **April 2026**

**NDE UI - Upgraded Resource Recommender** – The Resource Recommender has been upgraded, as follows:

- The **Recommendations** section can now be collapsed or expanded. (Previously, it could be closed by selecting the **X** at the top of the section, but then it could not be reopened. The **X** has been replaced by a collapse/expand arrow.)
- When the recommendation description is longer than 155 characters, a **Read more** link appears after the first 155 characters. Selecting the link opens the full description in a pop-up window.
- The formatting of the contents displayed in each tile has been improved.

For additional information, see [Resource Recommender for Primo VE](#).

- **April 2026**

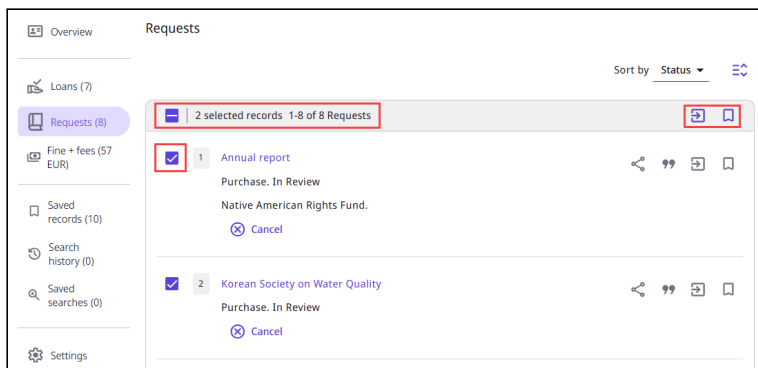

**Bulk Actions for Loans and Requests** – In the User Area, bulk actions are now supported for the Loans and Requests lists. Bulk actions enable the user to select the checkboxes of multiple records that appear in the list, and then select an action to implement on all of the selected records. The available bulk actions are

**Export and**

**Add to Saved Records.**

### Bulk Actions' Controls in the Requests Tab of the User Area

For additional information, see [Using the Enhanced User Area](#).

- **April 2026**

**NDE UI - Support for Esploro Services** – The NDE UI now supports online services from Esploro, enabling patrons to access Esploro record services.

- **April 2026**

**Autocomplete Entity Suggestions Based Only on Ranking** – The two autocomplete entity-suggestions shown for the **Search** field are now selected exclusively based on the rankings calculated for them by the API. (Previously, the two suggestions displayed were the highest-ranked suggestions available for their entity types. Persons were prioritized for the first suggestion, and organizations were prioritized for the second suggestion. Locations only appeared if neither persons nor organizations were found.) For additional information, see [Linked Open Data in the NDE UI](#).

- **April 2026**

**NDE UI - Accessibility Improvements** – As part of our ongoing accessibility improvements for the NDE UI, the following improvements were implemented:

- **Brief Record – Screen Reader Reading Order**

The HTML DOM structure of the brief record was refactored to ensure that assistive technologies present content in a logical reading sequence that matches the visual layout. As part of this improvement, the **Peer reviewed** label now appears in the correct position in the screen-reader reading order, supporting compliance with WCAG 2.1 Success Criterion 1.3.2 (Meaningful Sequence).

**Note:** Libraries that implemented customizations to the brief record should review those customizations following this change.

- **Advanced Search – Visible and Persistent Field Labels**

Improvements were implemented to ensure that form fields include visible and persistent labels in accordance with WCAG 2.1 Success Criterion 3.3.2 (Labels or Instructions). The **Enter a search term** field no longer relies solely on placeholder text that disappears once users begin typing. In addition, visible labels have been added or clarified for elements associated with the Search Field, Match Type, and Operator controls to improve clarity for assistive technology users.

Additional improvements will be implemented in the upcoming May release.

- **April 2026**

**NDE UI - Support for HTML Tags in Normalization Rules** – Support for HTML tags in normalization rules has been expanded. The following tags are now supported:

- a
- b
- br

- div
- em
- i
- img
- li
- ol
- p
- s
- span
- strong
- sub
- sup
- table
- tbody
- td
- th
- tr
- u
- ul

For additional information, see [Configuring Normalization Rules for Display and Local Fields](#).

- **March 2026**

**NDE UI - Non-English Search Terms in Natural Language Searches** – The handling of non-English search queries in the Natural Language Search ("Ask Anything") feature has been enhanced. Users can request search results in a particular non-English language in one of two ways:

- By specifying the language as part of the initial search term – for example, `Find me history journals in French that are available online`. In this case, all six of the permutations generated by Primo VE are generated in the specified language:

```
(histoire) OR (journaux historiques) OR (revues d'histoire) OR (études historiques)
OR (chroniques historiques) OR (archives historiques)
```

- By entering the search term in the required language – for example, `Trouvez-moi des revues d'histoire disponibles en ligne`. In this case, three of the permutations generated by Primo VE are in the language of the initial search, and three are in English:

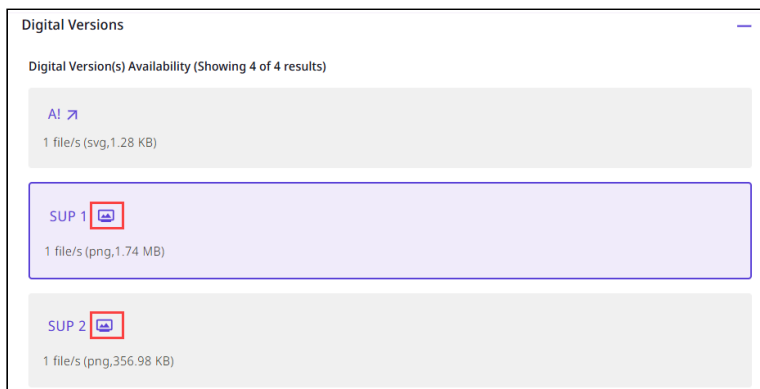

```
(histoire) OR (historique) OR (chronique) OR (history) OR (historical) OR
(chronicle)
```

English terms are included in the generated search term in this case because a substantial portion of the CDI index consists of English content. Adding English keywords increases the likelihood of retrieving relevant results.

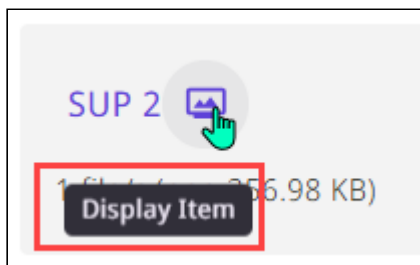

For additional information, see [Natural Language Search in the NDE UI](#).

- **March 2026**

**NDE UI - New Display in Viewer Button** – In the Full Display of image resources, under **Digital Images**, the **Display in Viewer** link has been replaced with a button. The new button appears beside the file name for each representation that can be opened in the built-in viewer.

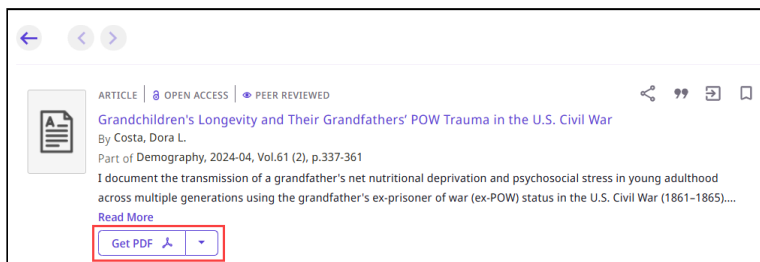

The button's tooltip changes depending on whether the representation is currently selected (and therefore displayed in the viewer). When it is selected, the tooltip is **Current item**; when it is not selected, it is **Display item**. The tooltips can be customized in the **ViewIt Labels** code table (**Discovery > Display Configuration > Labels**). Their codes are `nde.digital.currentItem.tooltip` and `nde.digital.displayItem.tooltip`.

For additional information about viewing images in the viewer, see [Primo NDE Viewer](#).

- **March 2026**

**NDE UI - Improved Handling of Unpaywall PDF Links** – The improvement that was implemented in the February 2026 release for the original UI has been implemented in the March release for the NDE UI: The source of Unpaywall PDF links that appear in the Brief or Full Display of a record has been changed. The Get PDF service now accesses Unpaywall links directly from CDI instead of using the Ex Libris/Proquest API. This allows for more timely updates from the Ex Libris Content Team and a better alignment between the Unpaywall collection links and the Unpaywall PDF links. No changes to customers' configuration of this feature are required. For additional information about this feature, see [Integrating Unpaywall for Discovery](#).

- **March 2026**

**NDE UI - Integration with campusM** – Work has been completed to support the campusM tile for the NDE view. Ongoing testing continues in preparation for the upcoming release, and customers are welcome to engage with us regarding this integration.

- **March 2026**

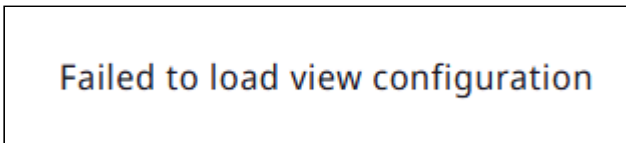

**NDE UI - Support for Leganto** – The NDE UI now supports sending the **Requests** section to Leganto (in addition to the **Locations** section, which was already available), enabling users to place requests directly from Leganto. The labels of these sections can be customized in the Full Display Labels code table ([Discovery > Display Configuration > Labels](#)):

- **Requests** – `nde.fulldisplay.leganto.requests`
- **Locations** – `nde.fulldisplay.leganto.locations`

For additional information, see [Leganto 2026 Release Notes](#).

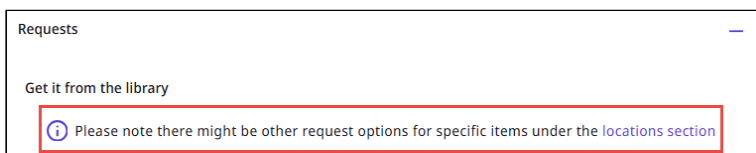

- **March 2026**

**NDE UI - Error Message for Unavailable Views** – When the user attempts to use an NDE-format URL to open an NDE view that does not exist, an error message is displayed.

- **March 2026**

**NDE UI - Notification of Item-Level Request Options** – The conditions under which a notification appears in the Full Description, informing users that item-level request options are available under the physical locations, have changed.

The notification now appears under the following conditions:

- Alma confirms that there are item-level request options available for the resource.

**And**

- The user is signed in.

- **March 2026**

**Research Assistant - Filter UX Improvements** – In the UX of the Research Assistant, the filter display has been improved. The filter icon is more visible, and the filters themselves are now displayed all the time instead of being in a drawer that was closed by default.

- **February 2026**

**Upgraded Version of Melingo** – As soon as the semi-annual indexing is completed, Primo VE will use the latest version of Melingo (v. 5.2.1-5.24). Melingo is a plugin that enhances Hebrew and Arabic search accuracy by performing morphological analysis on the search term. This enables Primo VE to better identify different forms of the same word so that it can produce more complete and relevant search results.

- **February 2026**

**Analytics - New Provider Field** – A new field, *Provider*, has been added to the Action Usage fact table. This search-attribute field contains the provider name for the following types of links when they are selected by the user:

- Link to source
- Additional link to source
- Link to PDF full text using CDI Quicklink
- Link to HTML full text using CDI Quicklink
- AI Insights

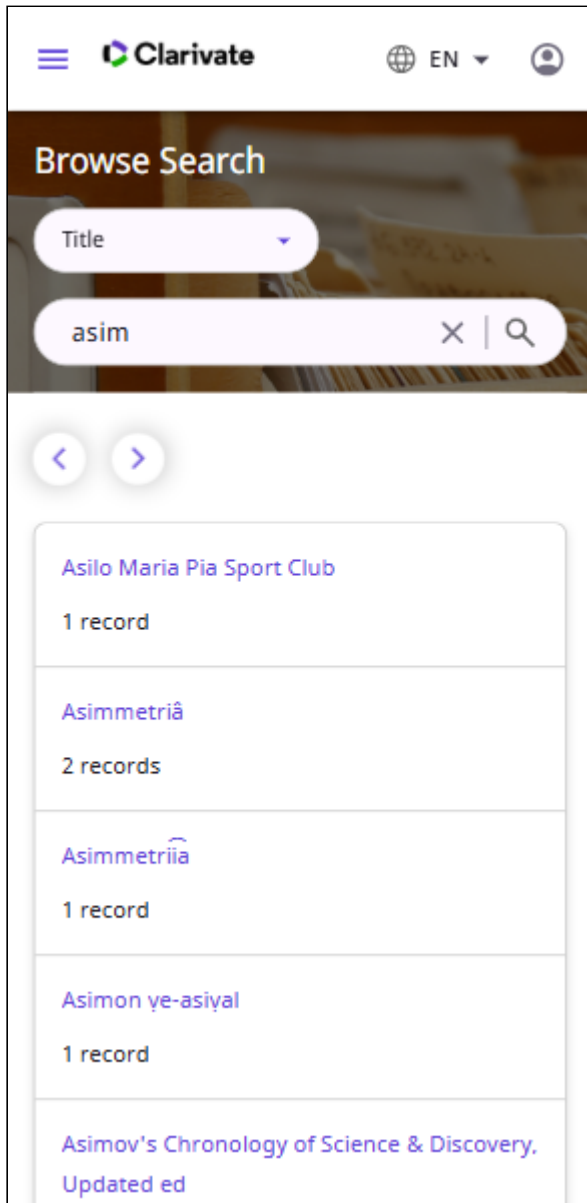

For additional information, see [Analytics Subject Areas for Primo VE](#).

- **February 2026**

**CSL Style Update** – The Citation Style Language (CSL) styles were refreshed from the central repository. The February release includes a snapshot from November 2025.

- **February 2026**

**NDE UI - Expanded Support for Browse Search** – Browse Search is now supported on mobile platforms and in Mixpanel analytics. For additional information about Mixpanel support, see [Mixpanel - Events and Properties for the NDE UI](#).

#### Browse Search on a Mobile Device

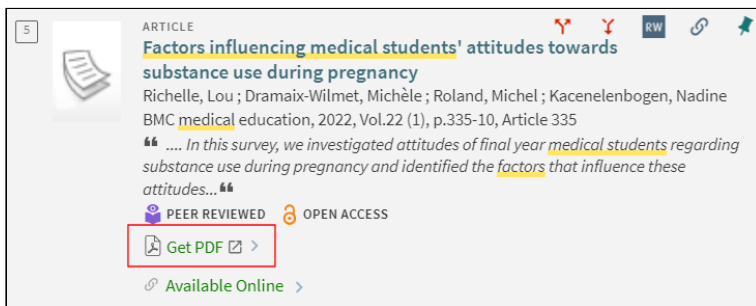

- **February 2026**

**NDE UI - HTML in Labels** – Support for HTML coding has been added to a number of additional labels. For additional information, see [Configuring Display Labels for Primo VE](#).

- **February 2026**

**Improved Handling of Unpaywall PDF Links** – The source of Unpaywall PDF links that appear in the Brief or Full Display of a record has been changed. The Get PDF service now accesses Unpaywall links directly from CDI instead

of using the ExLibris/Proquest API. This allows for more timely updates from the ExLibris Content Team and a better alignment between the Unpaywall collection links and the Unpaywall PDF links. No changes to customers' configuration of this feature are required. For additional information about this feature, see [Integrating Unpaywall for Discovery](#).

- **January 2026**

### Idea Exchange

**Indexing of 773 \$x field** – The 773 \$x field is now included in the ISSN index. This ensures that ISSNs specified in the 773 \$x fields of MARC21 article records can be found via the basic and advanced searches, a change that supports searching within locally cataloged articles. Including this field in the ISSN index requires re-indexing. Since re-indexing is being performed for all customers as part of the January release, it should not be necessary for individual customers to request re-indexing in order for this change to be implemented in their systems if the change is made before the re-indexing.

- **January 2026**

**Change in the activation process of the title\_equals\_exact\_phrase\_one\_subfield CP** – We have implemented a change to the activation process for the `title_equals_exact_phrase_one_subfield` option. This option is an enhancement of the Advanced Search for Titles under the operator **equals exact phrase** that enables end-users to find local titles if they match either MARC 245 \$a\$b or 245 \$a. From now on, the value of the `title_equals_exact_phrase_one_subfield` Customer Parameter should first be set to **true**, and *then* the database should be re-indexed. For additional information about this option, see [Configuring Discovery Views for Primo VE](#).

- **January 2026 - Collaborative Networks**

**Hiding digital resources from local scopes** – Member institutions in a consortium can now configure their IZ settings so that the search results of searches in local scopes do not include digital or external resources that are not held locally by the institution. To enable this option, set the `exclude_other_shared_digital_in_my_institution_scopes` parameter to **true** ([Configuration Menu > Discovery > Other > Customer Settings](#)). For additional information, see [Searching in Collaborative Networks](#).

- **January 2026**

**New Provider IDs** – Provider IDs for the following providers are now supported: Casalini, WISO, Pubmed Central. For additional information, see [OpenURL linking via metadata, DOI and specific provider IDs](#).

- **January 2026**

Added 14 Jan 2026

**CSL Style Update** – The Citation Style Language (CSL) styles were refreshed from the central repository. The January release includes a snapshot from October 2025.

- **January 2026**

**CERV Enhancement (ID #6729)**

**NDE UI - Automatic expansion of search results when no results were found** – The option to automatically expand a search when no results are found within the library holdings is now supported in the NDE UI. This means that Primo VE automatically turns on the **Expand My Results** option under **Refine your results**, which expands the search results to include CDI records that are not available locally. This functionality is only triggered for searches within scopes that include the complete range of the institution's holdings as well as CDI. To activate this option, in the Customer Settings (**Configuration Menu > Discovery > Other > Customer Settings**), set the `expand_my_results_when_no_results` parameter to **true**. For additional information, see [Configuring Discovery Views for Primo VE](#).

- **January 2026**

**NDE UI - Select multiple Views for an Add-on** – In the configuration of an add-on (**Configuration Menu > Discovery > Other > Add-on Configuration**), you can now select multiple Views in which to activate the Add-on. For additional information, see [Managing Add-Ons for the NDE UI](#).

- **January 2026**

**NDE-UI Additional metadata fields in resource-sharing requests** – We added additional metadata fields to the resource-sharing request form. These fields were included in the form in the original UI, but they were not initially included in the NDE UI. They have now been added to the form in the NDE UI. For information about configuring the resource-sharing request form, see [Configuring Request Forms for Primo VE](#).

- **January 2026**

**NDE UI - Sitemap creation** – We added support for NDE views to the Publishing Profiles job that publishes sitemap information to Google. URLs for new NDE views are now generated correctly for NDE.

- **January 2026**

**NDE UI - Enhanced Digital Versions section** – We have enhanced the **Digital Versions** section of the Full Display page. Under the **Digital Version(s) Availability** section, additional information about representations is shown, as follows:

- Representations that can be opened in the embedded viewer have a **Display in Viewer** link (unless they are currently displayed in the embedded viewer). Select the link (or the file name) to open the representation in the embedded viewer.
- Representations in formats that are not supported by the embedded viewer are identified by an arrow icon (). Select the file name to open the representation in an external viewer.
- If you are not logged into Primo VE, representations that can only be opened by logged-in users are identified by a lock icon () and the label, **You do not have permission to view this object**.

For additional information about viewing digital resources in the embedded viewer, see [Primo NDE Viewer](#).

- **January 2026**

Updated 11 January 2026

**NDE UI - Customize the loading animation** – It is now possible to customize the animation that appears while the NDE UI is loading. This can be done using the customization package. To do so, add the animation you want to use under `/assets/images/loadingAnimations/`. The animation must be in *Lottie* (JSON) format, and must be called `LoadingAnimationJson.json`. For additional information, see [Using the Customization Package Manager](#) and [Loading Animation](#) on the [NDE UI Customization - Best Practices](#) Knowledge Center page.

---

## Resolved Issues

- **April 2026 SF: 7864061**  
The no\_renewals field appeared in the Loans Detailed Display table (**Configuration > Discovery > Library Card Configurations > Loans Detailed Display**) even though it was no longer supported. It has been removed from the table.
- **April 2026 SF: 7867533**  
Virtual Browse did not include CZ-linked records with electronic inventory. This was fixed.
- **April 2026 SF: 7987529**  
Searches that contained local fields or fields related exclusively to local searches (classification\_ndc, course\_code, course\_department\_name, course\_instructor, course\_name, course\_searchable\_id, holdings\_information, holding\_call\_number, mms\_id, user\_tags) were sent to CDI. This was fixed.
- **April 2026 SF: 08013576 08316953**  
The rft\_doa\_j\_id parameter was missing from the Alma openURL. As a result, a URL resolved to the journal's contents page instead of directly to the article to which it should have resolved. This was fixed; the parameter was added to the API's URL resolver.
- **April 2026 SF: 8020317**  
In some cases, after adding a new row to the **View labels** code table, the dates in the **Updated By** and **Last Updated** fields of all of the rows in the table were changed to the current date. This was fixed.
- **April 2026 SF: 8039631**  
Bulk export failed in blended search scopes with long queries. In this situation, when the queries were long, it was expected that the results would only contain CDI records, but the export process should not have failed. This was fixed.
- **April 2026 SF: 8102734**  
When a record was opened from a Browse search, no results were shown for **Chapters of this book** and **Book reviews** when they should have been. This was fixed.
- **April 2026 SF: 08114766 08132886 08247380 08148177 08116808 08355175 08375424**  
Under certain circumstances, importing did not work when a list of codes was imported into a table. This was fixed.
- **April 2026 SF: 8034875**  
The Update Monitoring Status job kept failing. This was fixed.
- **April 2026 SF: 8126689**  
When bulk export was initiated from a link in a saved-search alert, records were included in the export that should not have been included. This was fixed.
- **April 2026 SF: 8139157**  
In the instructions that appeared when a user selected **Search for databases**, the option "Click on a letter above" was not shown, even though AZ search was enabled and available. This was fixed.
- **April 2026 SF: 08165827 08199444**  
In some cases, MARC tags that were marked as private and were not configured to display were still found in searches. This was fixed. Note that this fix requires re-indexing.
- **April 2026 SF: 8193569**  
Data was missing for the Research Assistant Usage SA and the Customized Values Usage SA in EU DWH. This was fixed.
- **April 2026 SF: 8141508**  
Searching by the language code "chi" caused local fields to be dropped from the query. This was fixed.
- **April 2026 SF: 8256360**  
Facets were loading slowly or not loading at all until the page was refreshed. This was fixed.

- **April 2026 SF: 8136066**  
**NDE UI** - In the mobile app (tablet size), the text indentation was not implemented correctly in certain pages. This was fixed.
- **April 2026**  
**NDE UI** - Various accessibility issues were corrected:
  - Accessible names of interface components that did not contain their visible labels were corrected.
  - Contrast between interface components and their backgrounds was improved.
  - Missing or hidden labels were made visible.
- **April 2026 SF: 8253059**  
**NDE UI** - Using the date facet increased the number of results instead decreasing it. This was fixed.
- **April 2026 SF: 8235196**  
**NDE UI** - HTML code was displayed in the mediatype.review label. This was fixed.
- **April 2026 SF: 8255708**  
**NDE UI** - Accessibility: "Skip to" was not translated and was always read by the screen reader in English. This was fixed.
- **April 2026 SF: 8241371**  
**NDE UI** - On small screens, the + button was sometimes hidden under other screen elements, and there was no visual indicator for collapsible sections. This was fixed.
- **April 2026 SF: 8253389**  
**NDE UI** - In the Full Display, the View Online section did not load if the page was opened before the Brief Results finished loading. This was fixed.
- **April 2026 SF: 08265455 08330884 08323612**  
**NDE UI** - In the Brief Results, HTML tags were not consistently supported. This was fixed.
- **April 2026 SF: 8250039**  
**NDE UI** - In Collection Discovery, *mediatype* labels with long descriptions overlapped collection titles. This was fixed.
- **April 2026 SF: 08241946 08325952**  
**NDE UI** - In the Journal search, the label `nde.journalsearch.category.option2` ("Click a letter") was not shown when **Display Category browse** was disabled. This was fixed.
- **April 2026 SF: 8265477**  
**NDE UI** - In both Chrome and Edge, when the **Export > Print** option was selected, the **Print** tab flashed and then closed. This was fixed.
- **April 2026 SF: 08273600 08364570**  
**NDE UI** - In the ILL form, the default format for chapter requests was incorrect. This was fixed.
- **April 2026 SF: 8287049**  
**NDE UI** - The label of the **Close** button was not translated in request forms when the interface language was not English. This was fixed.
- **April 2026 SF: 8278346**  
**NDE UI** - Citation-style labels did not support HTML tags as they should have. This was fixed.
- **April 2026 SF: 8278802**  
**NDE UI** - Accessibility: The behavior of the **Show More** button was not sufficiently clear with the JAWS screen reader. This was fixed.
- **April 2026 SF: 8277910**  
**NDE UI** - Accessibility: In the citation dialog box, the asterisk character was described by the JAWS screen reader as a "sextile" character. This was fixed.

- **April 2026 SF: 08280094 08281985 08275031**  
**NDE UI** - When a request link was selected in the **Requests** section of the Full Display page, the request opened in the same window, rather than a new window/tab, as it should have. This was fixed.
- **April 2026 SF: 8280080**  
**NDE UI** - In the Hebrew UI, the arrow of the link to a request form faced the wrong direction. This was fixed.
- **April 2026 SF: 8280115**  
**NDE UI** - In the confirmation dialog box of a **Request cancellation**, the title of the dialog box was not aligned correctly in Hebrew. This was fixed.
- **April 2026 SF: 8288666**  
**NDE UI** - The line indentation and spacing was incorrect for the Vancouver (AMA 11th edition) and APA (7th edition) citation styles. This was fixed.
- **April 2026 SF: 8280102**  
**NDE UI** - In the Hebrew UI, in the Requests sign-in prompt, the arrow of the icon faced the wrong direction. This was fixed.
- **April 2026 SF: 8298315**  
**NDE UI** - In the Database page, the alignment of categories that had no sub-categories was incorrect. This was fixed.
- **April 2026 SF: 8297164**  
**NDE UI** - The **Service unavailability display message** was not displayed when it should have been. This was fixed.
- **April 2026 SF: 8292867**  
**NDE UI** - HTML was not supported for the availability line. This was fixed.
- **April 2026 SF: 8306946**  
**NDE UI** - NDE: space delimiter did not display between fields in the Brief Display. This was fixed.
- **April 2026 SF: 8316508**  
**NDE UI** - Union View main-menu links were not distributed to IZ members. This was fixed.
- **April 2026 SF: 08327495 08343073**  
**NDE UI** - The ILL blank form did not change to digital format for book- chapter requests, as it should have. This was fixed.
- **April 2026 SF: 08297767 08293739 08297815 08295804 08301151 08352671**  
**NDE UI** - Accessibility: In the Brief Display, the peer-reviewed tag was only read by screen readers after the user performed more than 20 key presses, making it relatively inaccessible to visually impaired users. This was fixed. Note that this fix involved a significant refactoring of this functionality. It is recommended that customers who have implemented customizations in this area check them to make sure that their handling has not changed. For some additional details, see the **NDE UI - Accessibility Improvements** entry in the [Additional Enhancements](#) section.
- **April 2026 SF: 8324224**  
**NDE UI: Research Assistant** – The Library-Search **View More Results** option did not work with date filters. This was fixed.
- **April 2026 SF: 08256415 08325194 08331110**  
**NDE UI** - Under certain circumstances, the text "Generic Field:false" was added to the **Requester note** field of ILL- and purchase-request forms. This was fixed.
- **April 2026 SF: 8292721**  
**NDE UI** - The focus was not set to the **Available At Other Institutions** section when it should have been. This was fixed.
- **April 2026 SF: 8337317**  
**NDE UI** - In GES, the **Go to link** button was not clickable. This was fixed.
- **April 2026 SF: 8283170**  
**NDE UI** - The sort order of the Loans list did not match the order specified by the Fulfillment CP

primo\_loan\_list\_sorting, as it should have. This was fixed.

- **April 2026**  
**NDE UI** - Accessibility: For deep links, under certain circumstances, when a new tab was opened, the NVDA screen reader read the aria-label code rather than the label. This was fixed.
- **April 2026 SF: 8353420**  
**NDE UI** - When the copyright checkbox on a blank ILL form was selected, the **Agree to Copyright terms** checkbox was not selected in the borrowing request that was generated from the form. This was fixed.
- **April 2026 SF: 8359200**  
**NDE UI** - In the **My Account** area, in the **Loans** section, HTML tags were shown in external location names. This was fixed.
- **April 2026 SF: 08360691 08347590 08372040**  
**NDE UI** - In Collection Discovery, long collection and sub-collection titles were wrapped in the middle of words. This was fixed.
- **April 2026 SF: 08359744 08342711 08330870 08327900**  
**NDE UI** - Pickup locations were duplicated in hold requests. This was fixed.
- **April 2026 SF: 08387914, 08391630, 08391281, 08385078, 08386286, 08387211, 08371607, 08395025, 08397738**  
Images and links that were added to PNXs via normalization rules displayed as raw HTML code. This was fixed.
- **April 2026**  
**Research Assistant** – Various accessibility improvements related to support for screen readers were implemented.
- **March 2026 SF: 07935768 08174588 06538795 07007765**  
Previously, when the user performed an advanced search for a title with the **Starts with** option selected, Primo VE only searched for titles exactly as they were entered. If the user included an article ("the," "a," "an) at the beginning of the search string, the search only found titles that started with the entire search string, including the article, and if the user omitted the article, the search only found titles that started with the search string without a preceding article. This was fixed. Primo VE now expands the search strings in cases like these, so that it matches the string with and without the preceding article. This functionality can be turned on and off by Support.
- **March 2026 SF: 07018680**  
Searches in Hebrew for the name מֵיִסְטָר did not find resources with certain variations of the spelling of the name. This has been fixed; after consulting with Melingo, the missing variations were added to the thesaurus file.
- **March 2026 SF: 07887114 06934061 08360000**  
In certain cases, selecting a "Full text available" link resulted in a "No full text available" response. This occurred because the service was only available for certain libraries or campuses, and the library/campus was not included in the URL. This was fixed. The campus or library code from the view is now added to the OpenURL parameters and taken into account in situations like these.
- **March 2026**  
An incorrect resource type appeared in certain records that were processed using a particular import profile. This was fixed.
- **March 2026 SF: 08050053**  
In Analytics, actions related to the Titles in the Library By Person, Titles in the Library Written About Person and People Associated With Person sections of the Person page were incorrectly registered as "Featured Results". This was fixed.
- **March 2026 SF: 08060475 08187521 08076633 08290464**  
Old ftext data was not removed from the index. This was fixed.
- **March 2026 SF: 08114135**  
Hebrew records were missing from search results when a combination of the "contains exact phrase" query and the "contains" query was used. This was fixed.

- **March 2026 SF: 08170545**  
AutoComplete suggestions were not generated for records containing hyphens. This was fixed.
- **March 2026 SF: 08214034 08169226 08196780 08250740 08317671 08357010 08321411 08364327**  
No results were retrieved when searching for the term "AI" in the local search scope. This was fixed.
- **March 2026 SF: 08199805 08241057 08242333**  
Worldcat V2 did not work with Blending configurations. This was fixed.
- **March 2026 SF: 08178877**  
Bib records with no local holdings but with relation-based items were searchable when indexed individually, but not when they were indexed together with records that had holdings. This was fixed. This fix requires re-indexing.
- **March 2026 SF: 08224311**  
Initiating a new search with a person-entity page open failed to load. This was fixed.
- **March 2026 SF: 08225502 08288127**  
When a local field had a translation, the label of the active facet was not shown. This was fixed.
- **March 2026 SF: 08209092**  
APA 7 citations were created with incomplete dates for newspaper articles. This was fixed.
- **March 2026 SF: 08244205**  
Selecting "Show more items" twice (double-clicking slowly) resulted in garbled results. This was fixed.
- **March 2026 SF: 08214155**  
In certain cases, searches did not complete and returned no results. This was fixed.
- **March 2026**  
In a certain case, a title search that included both the title and the author's name did not rank the title at the top of the results, as expected. This was fixed.
- **March 2026**  
In certain cases, more than five related-entity cards were displayed in the Full View of a record, even though more than five are not supposed to be displayed. This was fixed.
- **March 2026 SF: 08280652**  
Permalinks did not retain the UI language as they should have; instead of opening the link in the language in which the permalink was created, they opened in English. This was fixed.
- **March 2026 SF: 08247738**  
Boolean operators (AND, OR, NOT) were incorrectly highlighted in search results as if they were part of the search terms. This was fixed.
- **March 2026 SF: 08253445**  
In some cases, NZ resource types were not applied in the correct order of precedence. This was fixed.
- **March 2026**  
In certain cases, the title and author were not automatically inserted in digitization requests. This was fixed.
- **March 2026 SF: 08147090 08364743**  
In the search field, the autocomplete suggested incorrect values for course codes. This was fixed.
- **March 2026 SF: 08213333**  
**NDE UI** - Booking-request pick-up times are now automatically corrected when the user selected hours at which the pick-up location is not open. When this occurs, a message explaining the change is included in the confirmation message displayed to the user when the request is accepted.
- **March 2026**  
**NDE UI** - Previously, when the user performed a simple search and then navigated to any of the My Library Card options, the text in the search bar was not removed as it should have been. This was fixed.
- **March 2026 SF: 08131132**

- NDE UI** - The ISBN label was not aligned to the left for Hebrew, as it should have been. This was fixed.
- **March 2026 SF: 08295986 08303886**  
**NDE UI** - The main-menu links overlapped the user-area menu. This was fixed.
- **March 2026**  
**NDE UI - Accessibility** A number of accessibility issues related to mismatches between the visual names and the accessible names of UI elements were fixed.
- **March 2026 SF: 08299966 08319739**  
**NDE UI** - The Newspaper search facet appeared when it should not have. This was fixed.
- **March 2026 SF: 08246690 08246662 08338831**  
**NDE UI** - The Ask Anything label was missing for search categories with multiple profiles. This was fixed.
- **March 2026 SF: 08248177**  
**NDE UI** - Previously, when an invalid View ID was used in the Primo VE URL, the page opened but it was corrupted, which was confusing to users. This was fixed. Now, in this situation, a page with an error message is displayed.
- **March 2026 SF: 08254706 08326480**  
**NDE UI - Accessibility** JAWS read generic text rather than the record title in the Brief Results. This was fixed.
- **March 2026 SF: 08256245 08353372 08365012**  
**NDE UI** - In the Resource Sharing form, the book-request fields did not reflect the Alma configuration. This occurred in both blank and regular resource-sharing forms. This issue has been fixed.
- **March 2026 SF: 08267599 08270528**  
**NDE UI** - Facets showed 0 or a negative number of resources when the blended scope contained EBSCO. This was fixed.
- **March 2026 SF: 08256445**  
**NDE UI** - Language codes appeared in the Full Display section instead of the names of the languages. This was fixed.
- **March 2026 SF: 08267960**  
**NDE UI** - UI-language dependent fields were displayed regardless of the \$\$8 value. This was fixed.
- **March 2026 SF: 08284889**  
**NDE UI** - Facets were missing from the search results when a deep link was used. This was fixed.
- **March 2026**  
**NDE UI** - In the Browse search, selecting the Back button in the browser removed the search option. This was fixed.
- **March 2026**  
**NDE UI** - The Favorites area in the mobile UI was not displayed correctly. This was fixed.
- **March 2026 SF: 08258668**  
**NDE UI** - The "Report a Problem" widget did not work due to a problem involving reCAPTCHA. This was fixed.
- **March 2026**
- **March 2026 SF: 08258481 08245065**  
**NDE UI** - The color of the nui.requests.download icon did not change as it should have when a different color palette was selected. This was fixed.
- **March 2026**  
**NDE UI** - Recent search suggestions with multi-word queries did not appear as expected. This was fixed.
- **March 2026**  
**NDE UI** - The text size of titles in the Brief Display was not correct. This was fixed.
- **March 2026 SF: 08311172**  
**NDE UI** - Search results did not load when a hard-coded search box was embedded. This was fixed.
- **March 2026 SF: 08227954 (Updated 3 March, 2026)**

- NDE UI - Linked Open Data** - When multiple images were available in Wikidata for a related entity, the one in the preferred format was not the one that was displayed. This was fixed.
- **March 2026 SF: 08237849 (Updated 3 March, 2026)**  
**NDE UI - Linked Open Data** - The sort order of the Person Info Cards in the Related Persons section for multiple related persons was not correct. This was fixed. The sort order is now: 1) Creator, 2) Contributor, and 3) Subject.
  - **March 2026 (Updated 3 March, 2026)**  
**NDE UI - Linked Open Data** - Dates retrieved from Wikidata were sometimes converted to a different, and incorrect, format when they were displayed in the UI. This was fixed.
  - **February 2026 06610870**  
The French synonym file was enriched.
  - **February 2026**  
A number of accessibility issues were fixed.
  - **February 2026 07899760**  
Generated citations were incorrect for some records with MARC 700i subfields. This was fixed. **This fix requires re-indexing for its implementation.**
  - **February 2026 08143938 08081878 08122667 08097566 08190080 08051561 07910150**  
Guest users appeared in Analytics for the Research Assistant, when the Research Assistant is not available for guest users. This was fixed.
  - **February 2026 08012695**  
A facet tooltip contained a label code instead of the label text. This was fixed.
  - **February 2026 08009092**  
Book permalinks created from a chapter list were missing the search scope and tab. This was fixed.
  - **February 2026 08089483**  
Labels from the Display Constant Labels table incorrectly included NOT\_DEFINED in the **Send to > Print** and **Send to > Email** outputs. This was fixed.
  - **February 2026 08149264**  
Previously, data from bib records in the dc was not enriched for most fields. This was fixed.
  - **February 2026 08144113 08269160**  
Custom search scope by collection was not working. This was fixed.
  - **February 2026 08157852**  
Custom library sort was not applied correctly in the results of many article searches. This was fixed.
  - **February 2026 07839387**  
In the Authority search, dots in 5XX related terms were added as delimiters when there was preceding punctuation. This was fixed. **This fix requires re-indexing for its implementation.**
  - **February 2026**  
Status messages were not automatically announced by screen readers. This was fixed.
  - **February 2026 08239082**  
When searching for author and title in Hebrew, the full match was not ranked highest. This was fixed.
  - **February 2026 08251781 Added 22 February, 2026**  
**NDE UI** - The My Loans list sorting for Library Activity and Historic Loans was unexpected and did not match. This was fixed.
  - **February 2026 08256390 08270236**  
**NDE UI** - Saved-search details were not properly displayed in the My Library Card overview. This was fixed.
  - **February 2026 08089338**

- NDE UI** - In the Login window, the focus was not on the Login button as it should have been. As a result, when the user entered their login details and then pressed Enter, login was not performed. This was fixed.
- **February 2026 08077543**  
**NDE UI** - In some cases, links appeared twice in the Full Display of records. This was fixed.
  - **February 2026 08120406 08284949**  
**NDE UI** - In some cases, code appeared in a label in the **Links** and **Source** sections of the Full Display. This was fixed.
  - **February 2026 08200536 08134084 08258805 08265838**  
**NDE UI** - Direct linking was sending multiple directLink requests per record, causing performance issues. This was fixed. We now send one directLink request per search result. This was fixed.
  - **February 2026 08134260**  
**NDE UI** - In the mobile app, the language highlighted in the language-selector dropdown did not match the actual current UI language. This was fixed.
  - **February 2026 08260298 08136773 08246822 08317455**  
**NDE UI** - When an NDE view was created from a non-NDE view, facets were sometimes not shown in search results. This was fixed.
  - **February 2026**  
**NDE UI** - Holdings of related titles were displaying as regular holdings in the **Available at Other Institutions** section. This was fixed.
  - **February 2026 08170085**  
**NDE UI** - HTML formatting was not implemented in the Authentication Note field. This was fixed.
  - **February 2026 08187595**  
**NDE UI** - When a record link from a saved search was sent in an alert email, the link did not work. This was fixed.
  - **February 2026 08217818**  
**NDE UI** - Label names were briefly shown in the homepage. This was fixed.
  - **February 2026 08202845**  
**NDE UI** - When navigating from the Database Search or Journal Search pages to the homepage by selecting the logo, the most recent search query remained in the search bar on the homepage. The search term should have been cleared automatically. This was fixed.
  - **February 2026 08288923 08283144 08288080 08286951**  
**NDE UI** - When the save\_users\_search\_history customer setting was set to false, Save query did not work. This was fixed.
  - **February 2026 08236228 08287202**  
**NDE UI** - When a user used the Feedback feature, the link to the view that was included in the confirmation email sent to the user was invalid. This was fixed.
  - **February 2026 08245376 08245081**  
**NDE UI** - Selecting the **Available at** line in the Brief Display opened the wrong section of the Full Display. This was fixed.
  - **February 2026 08239777**  
**NDE UI** - After a Newspaper search was performed, if the user selected one of the filters above the search results, and then selected the **All** filter, the **All** filter was not implemented, and the previous filter was still applied in the list of search results. This was fixed.
  - **February 2026 08247558**  
**NDE UI** - The citation generator did not work for records that contained text in multiple languages. This was fixed.
  - **February 2026 08253389**  
**NDE UI** - When the user selected a record in the search results before the page was finished loading, in the Full

Display, the **View Online** section was displayed briefly but then disappeared. This was fixed.

- **February 2026 08247825**  
**NDE UI** - A colon was incorrectly included in the Identifier field in some cases. This was fixed.
- **February 2026 08259949 08263941**  
**NDE UI** - Syndetics Unbound was not displayed for some customers. This was fixed.
- **February 2026**  
**NDE UI** - In the Saved Searches page, when the user selected **Set an alert for this search**, but no email address was specified in the user's settings, no notification indicating that the alert could not be set was shown. This was fixed. A notification now appears in this case.
- **February 2026 08289207 08285295**  
**NDE UI** - When placing a hold request, some pickup locations and institutions were missing from the list of options.
- **February 2026 Added 22 February, 2026**  
**NDE UI** - In the Recommendations section, recommendations of the same type were not sorted alphabetically by name, as they should have been. This was fixed.
- **January 2026 SF: 08003430 08181265**  
When multiple pipe characters (||) appeared together in a text, they were replaced by a new line. As a result, the pipe characters were not displayed, and the line was broken in the wrong place. This has been fixed, and the pipe characters are now shown correctly.
- **January 2026 SF: 07789207**  
Dedup/FRBR suppression rules were not applied correctly for resources of type database. This occurred because database resources is processed differently from other resource types. The problem was fixed by implementing a special handling process for database resources.
- **January 2026 SF: 08214240**  
Item counts were not updated in the facets when the **Search in Full Text** option was toggled off or on. This has been fixed.
- **January 2026 SF: 08009115**  
When the title of an external record contained italicized text, the text was not italicized, and <mark></mark> tags appeared before and after it in search results. This has been fixed.
- **January 2026 SF: 08081007 08137340 08137341 08023813 08207952 08139779**  
Full text indexing was failing for some records, and an error message appeared instead of the snippet of the full text that should have appeared in the search results. This has been fixed.
- **January 2026 SF: 08075916 07967686 08250017 07723358 07723479 08204938 07883325**  
In Safari browsers running on the MacOS called Sequoia, the facets were not scrolled properly when the page was scrolled. This has been fixed.
- **January 2026 SF: 08052745**  
Under certain conditions, the **Bulk Export** option was not included in the Brief Results page. This has been fixed.
- **January 2026 SF: 06873456**  
Searches for terms containing subscript or superscript characters were not handled as expected. This was fixed by adding normalization for subscript and superscript digits (0-9) and letters (a-z, A-Z).
- **January 2026 SF: 07922994**  
When Brief Results were generated from a Person Entity page by selecting the **See All Titles** links for the **Titles in Library Written by Person** or **Titles in Library Written about Person** sections, the **Sort by** facet contained no options. This has been fixed. The relevant options appear under the **Sort by** facet, and the **Date-newest** option is selected.
- **January 2026 SF: 08196647**

In order to prevent false dedup/FRBR matches, the following terms were added to the REMOVE\_COMMON\_WORDS list:

- introduction
  - Einführung
  - introducción
  - introduzione
  - introdução
  - inleiding
  - préface
  - preface
  - Vorwort
  - prefacio
  - prólogo
  - prefazione
  - prefácio
  - voorwoord
- **January 2026 SF: 08076644**  
When punctuation was included in a search term – e.g., an apostrophe in the name *O'Dee* – the Brief Results did not include snippets of the text in which it was found. This has been fixed.
  - **January 2026 SF: 07962938**  
HTML tags added to local and OTB display fields were corrupted by the highlighting mechanism. This has been fixed.
  - **January 2026 SF: 08083749 07972214**  
In Purchase Requests, in some cases, the **Requester note** field contained the text "nullAdditional information" before the actual note text. This has been fixed.
  - **January 2026 SF: 08093704**  
In the Research Assistant, Open Access PDF links were proxied even when the **Do not proxy Open Access records** option was selected. This has been fixed.
  - **January 2026 SF: 08080074**  
For certain records, when direct linking was disabled, selecting the **Available Online** link from the Brief Results page on a desktop or laptop PC did not work as expected in the Primo PI in campusM (although it worked as expected on mobile devices). This has been fixed.
  - **January 2026 SF: 08225754**  
Previously, the full display record would sometimes load before the view configuration was ready, causing the display of record details to be incomplete or incorrect. This has been fixed.
  - **January 2026 SF: 08238637**  
**NDE UI** - Accessibility: When using keyboard navigation, the **Escape** key did not close a dropdown menu as it should have. This has been fixed.
  - **January 2026 SF: 08253475**  
**NDE UI** - A label in the Hebrew interface of Collection Discovery was displayed when it should not have been. This has been fixed.
  - **January 2026 SF: 08248344**  
**NDE UI** - In the mobile UI, side margins were missing, causing page elements to be aligned on the left edge of the screen. This has been fixed.

- **January 2026 SF: 08145839**  
**NDE UI** - In the **Remove this Item** dialog box, a superfluous line was removed.
- **January 2026 SF: 08147055**  
**NDE UI** - The message and icon that are displayed in the *Saved records*, *Search history*, and *Saved searches* pages when no items are available for display was not vertically aligned properly. This has been fixed.
- **January 2026 SF: 08130516 08245034**  
**NDE UI** - Under certain circumstances, when a user tried to sign in, the sign-in screen did not open, and a blank page was shown. This has been fixed.
- **January 2026 SF: 08167836 08243193**  
**NDE UI** - Multiple holdings with items in temporary locations displayed incorrect location information. This has been fixed.
- **January 2026 SF: 08166396 08195379**  
**NDE UI** - HTML coding in the NDE label `login.dual.title` was not rendered correctly after sign-in attempts. This has been fixed.
- **January 2026 SF: 08111899**  
**NDE UI** - The code of the `delivery.code.citation_available` label was displayed instead of the label. This has been fixed.
- **January 2026 SF: 08130513**  
**NDE UI** - In the mobile UI, in the Citation Linker, the **Up** button was superimposed over the **Submit** button. This has been fixed.
- **January 2026 SF: 08095916**  
**NDE UI** - In collection descriptions, the HTML coding of links was shown instead of the links. This has been fixed.
- **January 2026 SF: 08221350 08259745 08247961 08273519**  
**NDE UI** - A number of problems in the blank resource sharing form were fixed.
- **January 2026 SF: 08223421 08215017**  
**NDE UI** - Electronic services were not shown as available in the Citation Linker. This has been fixed.
- **January 2026 SF: 08198502**  
**NDE UI** - When borrowing requests were initiated from CDI records, several fields were missing from the request details. This has been fixed.
- **January 2026 SF: 08222531**  
**NDE UI** - A space was missing in the message that is displayed after selecting results in Hebrew interface, making the message difficult to read. This has been fixed.
- **January 2026 SF: 08204561**  
**NDE UI** - In the full record, under **Related Titles**, the font size of the labels was inconsistent. This has been fixed.
- **January 2026 SF: 08211479**  
**NDE UI** - The booking form used the wrong MMS ID from a dedup group, causing the calendar to show no available dates even though items were bookable. This has been fixed.
- **January 2026 SF: 08198419**  
**NDE UI** - In the Physical Location configuration, HTML links that were included in the text of the External Name field were displayed in the UI as HTML code rather than links. This has been fixed.
- **January 2026 SF: 08190819 08245166 08281031**  
**NDE UI** - The text of custom links that appeared in the Links menu did not wrap as it should have. This has been fixed.
- **January 2026 SF: 08216109**  
**NDE UI** - Some display issues in the mobile UI, in the Full Display page, were fixed.
- **January 2026 SF: 08153616 08260215 08260450 08260186 08277381 08256405**

**NDE UI** - The login animation was displayed in the Full Display page when the **Links** section was expanded. This has been fixed.

- **January 2026 SF: 08182622 08241610 08277302 08277352 08287335 08293325**

**NDE UI** - Main menu links opened the English versions of the pages when they should have opened them in the current interface language. This has been fixed.

- **January 2026 SF: 08160901 08171643 08153993 08283528**

**NDE UI** - When adding a request or booking from an NDE view, the **Comment/Note** field was always populated with the text "Generic Field: false" in the request received in Alma. This has been fixed.

- **January 2026**

**NDE UI** - A label code did not exist for the label of the **Apply** button in the dialog box that is used to add an existing label to a saved record. As a result, the label description could not be modified. A label code has now been created for this button: `nde.favorites.labels.apply`. Its description can be modified from the All Code Tables page ([Discovery > Display Configuration > Labels](#)).

- **January 2026**

**Research Assistant** - In certain languages, on small screens, the New Topic button overlapped the label above it. This has been fixed.

- **January 2026**

**Research Assistant** - In right-to-left languages, certain arrow icons faced the wrong way. This has been fixed.

- **January 2026 SF: 08200313**

**Research Assistant** - Japanese searches inappropriately returned Chinese results. This has been fixed.

---

## CDI-Related Updates

This section lists the fixes and enhancements associated with CDI by their release date to ensure that Primo/VE customers are aware of the availability of these updates during and between releases of Primo/VE. When available, CDI updates are released on the first Wednesday of the month.

---

### Note

Unless otherwise specified, these updates apply to both Primo and Primo VE environments.

---

---

## 2026 Updates

### March 4, 2026

- **SF: 08254631**

The **ftext** search field was not mapped to CDI. This was fixed.

- An unrelated search result was retrieved when searching in the UI. This was fixed.

- **SF: 08286958**

The record for the streaming-audio version of the novel *Flight behavior* was not ranked high enough in the search results of a Simple search to be discoverable in Primo VE. It could only be found when the search was refined by the resource type "Streaming Audio." This issue is related to the ranking algorithm used by CDI. To fix the issue, the query was added to CDI's common-query modification list, which boosts its ranking in the list of search results based on its ISBN.

- The phrase "2024 may" was incorrectly handled as "2024." This was because "may" was not identified as the name of a month. The handling of the word "may" has been modified to prevent this from happening in the future.
