
Rialto Roadmap: 2026

Rialto Roadmap Highlights 2026

The Rialto roadmap serves as a key communication tool for sharing Rialto priorities with the Rialto community. It reflects both our strategic direction for the platform and the evolving needs of libraries and academic institutions.

This roadmap continues to be shaped in close collaboration with the Rialto community and is grounded in feedback and usage insights. Customer experience remains a central focus, with planned developments emphasizing streamlined workflows, expanded collection development capabilities, deeper analytics, improved integration across Alma, more content providers, and new acquisition models.

The Rialto roadmap provides a one-year forward view of planned enhancements and focus areas. During this period, Rialto development will continue to deliver functionality that supports more informed decision-making, better collaboration, and more efficient end-to-end workflows. These pages will be updated on a quarterly basis to highlight progress and upcoming enhancements across the roadmap.
