(URM-316125) Sections Alignment (For February)

January 2026 Analytics and Insights

The **Summary** option (**Analytics > Analytics Objects List > Customize > Sections Customization**) can no longer be modified. Additionally, all information from the **Summary** tab is aligned in a single column.

Sections Customization

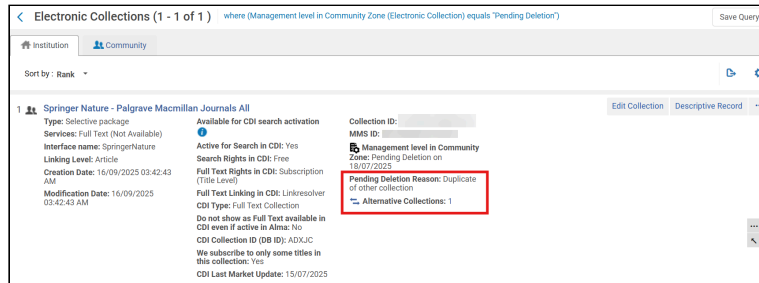

Summary Tab

(URM-313864) Electronic Collection Pending Deletion Reason and Alternative Collections CS ID Fields Now Available in Analytics.

January 2026 Analytics and Insights

Two new fields, **Electronic Collection Pending Deletion Reason** and **Alternative Collections CZ ID**, are now available in the **E-Inventory** Subject Area, specifically in the **Electronic Collection** and **Portfolio Details for Consortia Members/ Electronic Collection** folders. Additional information about collections pending deletion in the Community is now available in analytics, making it accessible even after the **pending deletion** collection has been deleted in Alma.

Pending Deletion Reason and Alternative Collections

For more information, see [Electronic Collection](#) and [Portfolio Details for Consortia Members \(Electronic Collection\)](#).

(URM-315114) Electronic Resource Network Data Accessible in a Single Location

January 2026 Analytics and Insights

All electronic resource Network fields are now available in a single location within the **Portfolio Details for Consortia Members** folder. Users can easily access all Network-related information in a single place, providing a clear and organized view.

For more information, see [Portfolio Details for Consortia Members](#).

(URM-253136) Rapido Manual Request Field Available

January 2026 Analytics and Insights

A new field **Rapido Manual Request** has been added to the **Rapido Attributes** folder in the **Lending Request (Resource Sharing)** and **Borrowing Request (Resource Sharing)** Subject Areas. This field measures when staff manually select to send the request to a Rapido partner and have the Rapido pod terms applied. Libraries may value the option to measure the frequency of this workflow overall, the frequency with particular partners, or evaluate the proportion of these requests in the context of mediated versus unmediated requesting with the Rapido pod partners.

For more information, see [Borrowing Requests \(Resource Sharing\)](#) and [Lending Requests \(Resource Sharing\)](#).

(URM-247151) Improved Encryption Method Applied to the User ID Encryption Field

January 2026 Analytics and Insights

The encryption method for the **User ID Encryption** field ([Analytics > Access Analytics > Create > Analysis > Fulfillment > Loan Details](#)) has been strengthened to provide enhanced data protection. The existing reports using a

specific value as a filter may need to be reviewed and updated to ensure they continue to function as expected.

Additional Enhancement

- **January 2026 Analytics and Insights**
The default year for Leganto Usage Dashboard has been changed to **2025**. This refers to the academic year.
