Question

How can I add cancellation text to the Interested Letter?

Answer

To display custom text in the Interested Letter when an order is **cancelled**, you can use the following XSL logic:

```
<xsl:choose>  
  <xsl:when test="contains(notification_data/message/text(), 'Cancelled')">  
    <!-- Add the cancellation message here (use a <p> tag) -->  
  </xsl:when>  
  <xsl:otherwise>  
    @@You_were_specify@@  
    <!-- Add the standard message here (use a <p> tag) -->  
  </xsl:otherwise>  
</xsl:choose>
```

The xsl:when condition detects cancellation messages and displays the cancellation text.
The xsl:otherwise section displays the default text when no cancellation is detected.
