

Best Practices

To make the most engaging exhibitions and get the most out of the Alma Specto Exhibition Builder, we suggest following these practices:

- Curate a focused selection (20–30 items recommended) to tell a clear story.
- Use high-quality images, between **50x50** and **10000x10000** pixels, for visual impact.
- Configure search to redirect to Primo for the full collection context.
- Preview thoroughly before publishing to ensure links and layout work as intended.
