Duration	6:03 min.
Description	This session introduces Alma Specto's AI Digital Metadata Assistant, showing how you can use AI to extract entities, tag them, and enrich metadata for digital collections. You'll learn how to make hidden resources searchable, linkable in Primo NDE, and ready for engaging exhibitions.
Target Audience	Library staff and catalogers who manage digital collections and metadata
Prerequisites	Familiarity with managing digital resources in Alma. Learn more in the training for Alma Digital
Attachments	Handout (transcript of this session)
