Main Stories

(URM-324397) Improve Visibility of Centrally Managed Bibliographic Records

June 2026 Analytics and Insights

Until now, a small subset of bibliographic fields has been available for members to report on bibliographic records in the Network for e-resources available for them. With the new enhancement, members can report on the full set of bibliographic information for e-resources. This enables access to complete Network bibliographic information without relying on the central office, enabling members to efficiently create reports covering the full scope of their data.

For more information, see [Portfolio Details for Consortia Members](#) and [Analytics Configuration in a Network Zone](#).

(URM-327492) Updated Documentation for Analytics Tables

June 2026 Analytics and Insights

As part of an ongoing project and in alignment with the Analytics Community of Practice, Ex Libris is currently enriching the documentation of analytics field tables with additional information. This initiative aims to assist and support users in comprehending how our Alma data is presented within the realm of Analytics fields. For this month, the following tables within the Analytics Subject Areas were updated:

- [E-Inventory > Electronic Collection License](#)
- [Funds Expenditure > Transaction Date](#)

Additional Enhancement

- **June 2026 Analytics and Insights**

New field, **Citation Uploaded File Default**, has been added to the following Alma Analytics Subject Areas. It indicates which uploaded file is selected as the default for a citation based on explicit selection or creation date.

- **Course Reserves (Analytics > Access Analytics > Create > Analysis > Course Reserves > Reading List Citations)**

- **Leganto Instructor Usage Events**([Analytics > Access Analytics > Create > Analysis > Leganto Instructor Usage > Citations](#))
- **Leganto Student Usage** ([Analytics > Access Analytics > Create > Analysis > Leganto Student Usage > Citations](#))

For more information, see [Course Reserves](#), [Leganto Instructor Usage Events](#) and [Leganto Student Usage](#).

June 2026 Analytics and Insights

New field, **Number of Sections**, has been added to the **Course Reserves** ([Analytics > Access Analytics > Create > Analysis > Course Reserves > Reading List Citations](#)) Subject Area. It counts the number of sections in a reading list.

For more information, see [Course Reserves](#).

- **June 2026 Analytics and Insights**

New fields, **Additional Author**, **Additional Title**, **Other Standard ID**, **PMID**, **Remote Record ID** and **Series Title Number** have been added to the following Alma Analytics Subject Areas.

- **Course Reserves** ([Analytics > Access Analytics > Create > Analysis > Course Reserves > Reading List Citations](#))
- **Leganto Instructor Usage Events**([Analytics > Access Analytics > Create > Analysis > Leganto Instructor Usage > Citations](#))
- **Leganto Student Usage** ([Analytics > Access Analytics > Create > Analysis > Leganto Student Usage > Citations](#))

For more information, see [Course Reserves](#), [Leganto Instructor Usage Events](#) and [Leganto Student Usage](#).

- **June 2026 Analytics and Insights**

New field **Students that Accessed Full Text** has been added to the **Leganto Student Usage** ([Analytics > Access Analytics > Create > Analysis > Course Reserves > Student Usage](#)) Subject Area. It displays and counts all downloads that were made during the course date events.

For more information, see [Leganto Student Usage](#).
