Main Features

New Partner Institution and Library Fields in Request APIs

June 2026 Fulfillment and Resource Sharing

CERV Enhancement (ID#1269)

Rapido Lending and Borrowing Request APIs have been enhanced to include borrowing and lending institution and library codes, enabling improved partner information visibility for API-based integrations. The new fields are available in borrowing and lending request responses, as well as in Rapido partner records (read-only), and support both Rapido and Rapid workflows. The following fields have been added:

- Borrowing Request API (Rapido attributes)
 - `lending_institution_code` — The lending institution code
 - `lending_library_code` — The lending library code
- Lending Request API
 - `borrowing_institution_code` — The borrowing institution code
 - `borrowing_library_code` — The borrowing library code
- Rapido Partner API/Records
 - `institution_code` — The institution code of the partner
 - `library_code` — The library code of the partner

Enable Multiple Off-Times Lending Periods

June 2026 Rapido

Rapido now supports defining multiple lending off-time periods per resource sharing library. Libraries can add, edit and manage multiple planned closure periods instead of being limited to a single inactive date range. **Temporary Inactive Date Ranges** are displayed as a list and saved in bulk using a new **Save** action. Overlapping date ranges are not allowed, and libraries remain available for selection even if they already have defined off-times. This allows libraries to plan ahead and manage scheduled closures more flexibly.

RS Library	Turn Off Lending For	Inactive Dates
1. Law Library Music Library	Everything	21/04/2026 - 28/04/2026
2. Resource Sharing Library	Physical	21/04/2026 - 28/04/2026
3. Law Library	Everything	18/05/2026 - 25/05/2026
4. Resource Sharing Library	Physical	18/05/2026 - 27/05/2026

Temporary Inactive Date Ranges

For more information, see [Temporary Inactive Date Ranges for Lending](#).

Ability to Hide the Blank Form

June 2026 Fulfillment and Resource Sharing

Idea Exchange

Rapido now supports hiding the **Blank ILL Request** link from the top menu in **PrimoVE** and **NDE** based on user group configuration. This extends the existing option to hide the blank request form from search results, allowing libraries to control visibility. When configured, the link is hidden for selected user groups and remains visible to others. The configuration for non-logged-in users has also been updated to support hiding this link, providing more consistent control over blank form access.

Hide Rapido Blank Form

For more information, see [Hide Rapido Blank Form](#).

Automated OCR Processing

June 2026 Fulfillment and Resource Sharing

Automated OCR processing is now applied to PDFs shipped using the API and automated job (**Automatically Ship Rapido Digital Requests** (default **Inactive**)) for files sent to ISO partners, ensuring files delivered to borrowers are machine-readable and easier to use.

For more information, see [Rapido Automated OCR Processing](#) and [Automatically Ship Rapido Digital Requests Job](#).

Additional Enhancements

- **June 2026 Rapido**

New out-of-the-box sets are now available to help staff manage Rapido requests more efficiently. These sets help identify requests requiring attention and can also be used as templates when creating custom sets to organize resource-sharing tasks.

For more information, see [Rapido Sets](#).

- **June 2026 Rapido**

The **CCC Get It Now Cloud App** has been removed from Rapido following the discontinuation of the **Get It Now** article delivery service. A message has been added to the **Cloud App Center**: CCC has announced that the Get It Now article delivery service will be discontinued on June 30, 2026. The Rapido Get It Now cloud app will be removed on June 7, 2026. Please update any workflows that rely on this integration.

- **June 2026 Rapido**

RapidR routing algorithm prioritizes print holdings over electronic formats. Returnable requests are routed to lenders with eBook holdings only when no print lenders are available. This change aligns with community expectations that returnable requests are fulfilled primarily from print collections, with a physical item shipped to the borrowing institution.

For more information, see [RapidR \(Returnables\) Print Over Electronic Routing Prioritization](#).

Resolved Issues

- **June 2026 Rapido SF: 08094546**
Previously, when a loaned item was returned through the **Return Items** menu and had an associated lending resource sharing request, the **Resource Sharing Shipping Slip** letter was not triggered. This was fixed.
- **June 2026 Rapido SF: 08169326**
Previously, **Fill Locally** workflow sometimes created a lending request to the wrong member. This was fixed.
- **June 2026 Rapido SF: 08334212**
In some cases, a fee was created with a null sum. This was fixed.
- **June 2026 Rapido SF: 08350487 08443201**
In some cases, when a borrowing request required mediation, the owning library did not match the pickup location. This was fixed.
- **June 2026 Rapido SF: 08367215**
Previously, the Rapido **Expand Search** banner was incorrectly displayed in newspaper search results. This was fixed.
- **June 2026 Rapido SF: 08316358**
Previously, physical journals did not display the correct labels, and the physical no-offer labels were missing from the physical journal tile. This was fixed.
