

Verde Functional Training - The Acquisitions Module

Description:

This course builds on the high-level Acquisitions overview in the Verde Core training. The Acquisition Functional training explores how to view, create, and change Acquisition records. Then, the module walks through the Acquisition lifecycle, and explores how Acquisition status changes depending on the workflow and associated tasks. The module closes with the Verde loaders and reports that can be used for Acquisitions.

This course includes the following sessions:

- [01 Acquisitions Record](#)
- [02 Acquisitions Lifecycle](#)
- [03 Loaders and Reports](#)

Course duration:

24.5 minutes

Intended audience:

Technical librarians, Systems librarians

Prerequisite:

Verde Core Training course
