

Verde Functional Training - Trial

Description:

This module builds on the high-level Trials overview in the Verde Core training. The Trial Functional training explores how to view, create, and change License records. Then, the course walks through the Trial lifecycle, and explores how Trial status changes depending on the workflow and associated tasks. The course closes with the Trial tasks used for participant notification and to manage the trial process.

Please follow the order of the lesson, and complete the related exercises.

This course includes the following sessions:

- [01 Trial Record and Data](#)
- [02 Trial Lifecycle](#)
