
Aleph-Rosetta synchronization problem with a long record

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

Large Aleph record can't pass the Aleph-Rosetta synchronization process (called "CMS update" in Rosetta). The error message in the log of Rosetta server indicates that Rosetta cannot read the response sent by the Aleph.

Cause:

Defect

Resolution:

This problem will be solved with rep_change 2595 (Aleph 21) and 108 (Aleph 22):

Description: Aleph-Rosetta synchronization process - problem with big documents.

The xml buffer limit was limited to 45K bytes long.

?

Solution: This has been corrected. Now, the xml buffer is 60K bytes long.
