
Remove bX Logo from SFX Menu

- **Article Type:** General
- **Product:** bX
- **Product Version:** 4

Desired Outcome Goal:

Remove bX logo from the SFX Menu (also sometimes called the Services tab or More tab in Primo)

Procedure:

To remove the logo, on the SFX server:

- tm [templates directory for your instance]
- cd css/simplified_template1/
- vi sfxmenu.css
- add this line:
`span.alignRight img { display:none }`

Additional Information

Note that the image contains a tooltip explaining bX, so it could be useful to users if the image is replaced with a ? or some other information-indicating icon. The text of the tooltip is configurable from the SFX admin > Configuration > Translation & Display > SFX Main Menu > Message Code = "Displayer->Recommendation->Title->bX How does it work"

TMPL_VAR IMG_DIR = enter: tm; cd img/bx

TMPL_VAR BX_LOGO_IMAGE = bx_logo.png

The bX logo-related HTML is in the file

```
<span class="alignRight alignRight_">"
title="<TMPL_VAR 'MESSAGE("SFX Menu Main","Displayer--Recommendation--Title--bX How does it work")">"> </span>
```

For more information about bX-SFX Interoperability, see DocCenter > Cross-Product > Integrations > bX-SFX > bX-SFX Configuration Guide.pdf
