## Replace GetIt Tab Text with Image

- **Article Type:** General
  - **Product:** Primo
  - **Product Version:** 4
- 

### Desired Outcome Goal:

Replace the text in the GetIt tab(s) with an image.

The GetIt tabs are also called View Online, More, Services, etc.

### Procedure:

Change the text field content to a link to the image (see below) in Advanced Configuration > All Code Tables > Sub System = Delivery > Table Names = GetIT! Tab1 and/or GetIT! Tab2.

#### \* Tab1 Codes

\*\* default.getit.tab1\_onl\_restrict  
\*\* default.getit.tab1\_nofull  
\*\* default.getit.tab1\_fulltext\_unknown

#### \* Tab2 Codes

\*\* default.getit.tab2\_notexistcheck  
\*\* default.getit.tab2\_notexistunavail  
\*\* default.getit.tab2\_onl\_mayrestrict  
\*\* default.getit.tab2\_onl\_norestrict  
\*\* default.getit.tab2\_onl\_restrict  
\*\* default.getit.tab2\_restrict  
\*\* default.getit.tab2\_unavail  
\*\* default.getit.alma\_tab2\_full  
\*\* default.getit.alma\_tab2\_fullunknown  
\*\* default.getit.alma\_tab2\_mayrestrict  
\*\* default.getit.alma\_tab2\_nofull  
\*\* default.getit.alma\_tab2\_norestrict  
\*\* default.getit.alma\_tab2\_onl\_mayrestrict  
\*\* default.getit.alma\_tab2\_onl\_norestrict  
\*\* default.getit.alma\_tab2\_onl\_restrict  
\*\* default.getit.alma\_tab2\_restrict  
\*\* default.getit.alma\_tab2\_unknown  
\*\* default.getit.tab2\_availother  
\*\* default.getit.tab2\_check  
\*\* default.getit.tab2\_full  
\*\* default.getit.tab2\_getit  
\*\* default.getit.tab2\_mayrestrict  
\*\* default.getit.tab2\_nofull  
\*\* default.getit.tab2\_norestrict  
\*\* default.getit.tab2\_notexistavail  
\*\* default.getit.tab2\_avail

---

## Additional Information

### Image Location Options

- \* Use image on Primo server: ``
- \* Use SFX image icon from the SFX server: ``
- \* Use image from another location: ``

HTML ALT attributes do not work for this tag. Instead, add a line to the table: Advanced Configuration > All Code Tables > Sub System = Front End > Results Tile table >

- \* GetIt! Tab1 = default.brief.tabs.links.title.viewOnlineTab
- \* GetIt! Tab2 = default.brief.tabs.links.title.moreTab.

### Sizes that work:

- \* 80 x 25
- \* 54 x 20
- \* 54 x 15
- \* However, when the page width falls below about 90% (tested on laptop screen), anything above 15px in height is cut by the line below the tab names

**Category:** Front End

**Subject:** Availability/RTA
