

UStat data - can it be edited?

- **Article Type:** Q&A
 - **Product:** UStat
-

Question

UStat data sometimes needs to be updated. For example, change/edit Subscriber on individual accounts.

How to update data?

Answer

A development program exists for this on the long term roadmap.

In the meantime, the files (Excel or SUSHI) can be downloaded, deleted and re-uploaded. This should be done in the following order:

- 1) From the "Uploaded Files" screen, find the problematic file.
 - 2) For each file, click on the "File" link, and save the file to your computer (set aside a folder for this).
 - 3) After the file is downloaded, edit it (outside of UStat)
 - 4) Delete the file in UStat
 - 5) Upload a correct file
-

Additional Information

The files won't be over-written, also if SUSHI is defined.
