

Font size decreases when CombinedCharSupported=Y

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
-

Problem: Font size may decrease when CombinedCharSupported=Y is used

Resolution:

It would be an enhancement request to have separate entries in font.ini. Experience has shown that enhancement requests submitted through the ELUNA or IGeLU enhancement processes have a much greater chance of being included in new versions of Aleph than those submitted through the eService. These processes provide a means for gauging the importance of enhancement requests, the impact that they would have, and the best way to implement these for the entire customer base. Enhancement requests in the eService have none of these features, so the Product Manager is usually not able to determine their relative priority vis-a-vis others when planning for new releases. For these reasons, we strongly recommend that you submit your enhancement request through one of these channels.
