

System Maintenance Job failed or completed with errors

- **Article Type:** Q&A
 - **Product:** Alma
 - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
-

Question

"System Maintenance Job" shows in Monitor Jobs as running, failed or completed with errors. Is this something to be concerned about?

Answer

Please disregard this job. System maintenance jobs are run periodically by the Alma Development team. The jobs are monitored, so if a job fails, the team will attempt to run it again at another time.
