## GDC Job fails, reports other import process running

- **Product:** Voyager
  - **Product Version:** 9.0.0 - 9.2.1
  - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
- 

### Symptoms

- GDC Data Change Job fails
- `jobd.log` shows error: "A bulkimport process is already running for this database. Use the -M switch to allow multiple processes."
- No other bulk import processes running at time of failure

- **Defect Status**

Issue VYG-6406 is resolved for Voyager 9.2.1 and higher.

### Replication Steps

1. Create a record set of 10,000 records or greater.
2. Create a data change rule set group to update the records in the record set.
3. Start a Data Change Job.
4. One or several bulks of records will successfully export-transform-import before job fails.
5. `jobd.log` shows error: "A bulkimport process is already running for this database. Use the -M switch to allow multiple processes." However, no other bulk import processes running.
