
ACQ: Edit approved line item, extended allocation, results in RTE 9

- **Article Type:** Known Issue
 - **Product:** Voyager
 - **Product Version:** 7.2.3
 - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
-

Symptoms

Approved line items that don't have extended fund allocation get "Run-time error 9: subscript out of range" when attempting to go to Line Item > Edit Approved when the fund is more than 100% allocated.

Defect Status

Issue 16384-13777 is resolved for Voyager 8.1.0 and higher.

Replication Steps

1. Create a PO.
2. Add a line item, linking this copy to just one fund.
3. Approve the PO.
4. Go to Line Item>Edit Approved.
5. Highlight the line item and click Extended Fund Allocation.
Because the existing fund is already at 100%, you can't add a new fund; instead, click Edit Fund.
6. Change the Percentage to something < 100 – you'll get the run time error.
- 6a. The same is true if you try to remove the existing fund and add two new ones:
Instead of Edit Fund, click Delete Fund.
Click Add Fund, pick a fund, and add a Percentage that is < 100 – you'll get the run time error.

Workaround

Copy existing PO (with components relinked if it is a serial title with a check-in record). This PO will be in Pending status, and changes can then be made to the fund allocation.

Additional Information

This issue is also related to 16384-16001.
