
Imageserver is not functioning after upgrade to voyager 8.0

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7.2.2
 - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
-

Symptoms

"Active X error: error 429 in cataloging:send" returned when image server sends catalog data to catalog client

Defect Status

Issue VYG-4528 fixed for Voyager 8.0.0 and higher.

Replication Steps

1. Scan document and save as a pdf file
 2. Start Catalog
 3. Start Imageserver
 4. Select File Documents tab which opens up File Documents dialog box
 5. Select "New"
 6. In the Title input parameter, I type in Frank test
 7. Select OK
 8. Select "Disk"
 9. I find the file I want to store. In my case I use [c:\voyager\ImageServer - July 2001.pdf](#)
 10. Select Add and then Back
 11. Double click "Disk Import" which now shows the file I found
 12. Select "Add Document"
 13. In the "Enter document description" input area I type "Frank test" and then select OK
 14. Click on the "Send Cataloging" button
