

Restoring records deleted via Bulkimport

- **Article Type:** Q&A
- **Product:** Voyager
- **Product Version:** All
- **Relevant for Installation Type:** Direct; Local; Total Care

Question

Is it possible to restore records deleted through BulkImport or authority records removed for 3rd party headings work?

Answer

Bib and MFHD records deleted via the Bulk Import batch job (either thru WebAdmin or by submitting commands on the server) are archived in the delete* files in /rpt. See: [Are deleted bibs, mfhds, items archived?](#)

If retained, the log files generated by the Bulk Import process can be reviewed to identify which Bib and MFHD record IDs were deleted (format is log.imp.DATEESTAMP.processID).

Example of log file from Bulk Import job that deleted 1 bib (ID 6600) and 1 mfhd (ID 6802):

```
I am 7494 ( started from process id: 7475 ). I will be doing all of '/m1/voyager/tmp/cgipost-82e4f19052cea9d993a4338ad20d84c9-7358.tmp' for you.
The import code is "DELETE" for this run.
The Bib dup profile is "BBID" for this run.
This import is using a rule that does not allow creation of MFHDs or Items.
The Mfhd dup profile is "MFHD-replace" for this run.
Expecting Marc21 UTF-8 Records
Wed Oct 14 07:59:46 2020
1(1):Duplicate Bibs above threshold: replace 1, warning 0.
  BibID & rank
  6600 - 100
2(1):Duplicate Mfhds above threshold: replace 1, warning 0.
  MfhdID & rank
  6802 - 100
  MFHD 6802 deleted.
  BIB 6600 deleted.
