

Analytics - Total (sum) at Top of Table

- **Product:** Alma
-

Question

Creating an analysis with Columns and Measures, and trying to show total row, it is only possible to select the total as "After". It means that the total row is always displayed at the bottom of the table.

How can the total displayed at the top of the table?

Answer

For a total results count to display at the top of the table, see this How To document:

- [How to use RCOUNT to display the total number of rows in an Analytics report](#)

Should a new version for this document be published, find it at "[Presentations and Documents - Analytics](#)".

Additional Information

See also "[Analytics - Total \(sum\) at Top of Table](#)[Displaying the total number of rows at the top of an Analytics report](#)".
