## GDC: Preview "Jump Ahead" fails with RTE 65099/440 on large jumps

- **Article Type:** Known Issue
  - **Product:** Voyager
  - **Product Version:** 8.1.1
  - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
- 

### Symptoms

\* Enter large number in "Jump ahead" box in Preview and click Jump; results in run-time errors:  
Run-time error '65099': Connection lost. Application will be aborted.  
Run-time error '440': Application-defined or object-defined error

---

### Defect Status

Issue VYG-6240 is resolved for Voyager 9.1.1 and higher.

---

### Replication Steps

1. Find or create a large record set in GDC (100,000 records or more)
  2. Preview > Choose record set & any data change rule set group
  3. In Preview window, enter 50000 in "Jump ahead:" box
  4. Click Jump button
  5. Within a few seconds, client gives error: Run-time error '65099': Connection lost. Application will be aborted.
  6. Click OK and client gives second error: Run-time error '440': Application-defined or object-defined error
  7. Click OK and client closes.
- 

### Workaround

Enter smaller number (i.e., 25000) in "Jump ahead:" box

---

### Additional Information

Number in "Jump ahead:" box that produces error may vary by version.

**Category:** Global data change (GDC)
