## DISCARD or DELETE in GDC string translates to msgObj.setDiscard()

- **Product:** Voyager
  - **Product Version:** 8.0.0
  - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
- 

### Symptoms

"DISCARD" or "DELETE" are translated as "msgObj.setDiscard();" "msgObj.setDelete();" when added into the new record

### Defect Status

Issue VYG-6721 is currently in development.

### Replication Steps

1. Create a record set of bibs or MFHDS
2. Create a Data Change rule set with a rule adding a new MARC subfield, adding a text string including "DISCARD" into the new subfield
3. Run a Preview with this criteria; note the translation of "DISCARD"
4. Run a data change preview job; examine the results file; note the translation of "DISCARD" as "msgObj.setDiscard();"

### Workaround

Use a string that avoids using words that can be translated into functions.
