
Configuring Voyager as Email Server for OPAC

- **Product:** Voyager
 - **Product Version:** All
 - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
-

Question

What should be filled in for mail.host in the webvoyage.properties when configuring records to email from the OPAC, and the Voyager server is acting as the mail relay server?

Answer

Use `localhost` rather than any IP or domain name for mail.host value.

Additional Information

Also be sure `mail.from=voyager@{Voyager server hostname}`
