
Aleph 22 and AIX DB in a Two-Task environment

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 22
-

Question

Will Aleph 22 work in a Two-Task environment where the application is on Linux, but the database is on AIX?

Answer

Since the application is installed on a Linux machine, it should work with a database on an AIX machine as long as the Oracle version of the database is 11.2.0.4 (the Oracle version which was certified for Aleph 22).
