
aleph_startup: ... monitoring startup complete signal

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

After upgrading to v20 via Upgrade Express, when we run aleph_startup it hangs with these lines:

```
starting illsv background daemon...
```

```
Load: /exlibris/aleph/u20_2/alephe/tab/tab100
```

```
Load: /exlibris/aleph/a20_2/illsv/tab/tab100
```

```
cycling server.log
```

```
monitoring startup complete signal
```

```
.....  
.....<etc.>
```

Resolution:

This behaviour is caused by JBoss startup script. JBOSS is used for RESTful APIs -- such as, OvP/ Opac via Primo . (More information can be found on EL Commons.)

If you are not performing RESTful API's you can comment out the following lines near the end of aleph_startup:

```
cd $aleph_dev/ng/aleph/home/system/bin
```

```
bash jboss_startup.sh
```

If you do use jboss, do the diagnosis described in Article 000033823 ("jboss not starting").
