## Location of October 2012 Oracle patch on ftp server

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

The Ex Libris Documentation Center > Cross-Product > Technical Documentation > Oracle > Oracle 11g > October 2012 Oracle Patch Set Update for Ex Libris Products Using 11.2 document has the following step:

3 Download the appropriate upgrade package from the /oracle/11.2.0.3/<platform>/quick directory on the Ex Libris FTP server.

But, logging on as produser, the Oct. 2012 patch is in a different directory:

```
/oracle/OCT2012_PSU/Linux64/quick
```

### Cause:

File in different directory on ftp server.

### Resolution:

The /oracle/OCT2012\_PSU/ directory seen on Nov. 27, 2012, no longer exists.

On Dec. 31, 2012, the /oracle/11.2.0.3/Linux64/quick/ directory has the patch (-- as stated in the doc.)
