## MS: Daily fines incrementing fractionally

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** 7.2.1
- 

### Description:

Bug Report Form for Issue 16384-31555

Date: 6 October 2010

Module(s): Media Scheduling

Release(s) replicated in: 7.2.1

Last version without bug (if applicable): [previously filed as Issue 15010]

Expected results: When an item with a daily fine rate is charged in Media Scheduling, the fine will increment daily.

Actual results: Daily fines do not increment daily.

Workflow implications: Overdue fines are incorrect.

### Replication steps:

1. In Media SysAdmin

a. Under Policy Groups > Policy Rules, make sure your patron group has "Fines Apply" checked.

b. Under Policy Settings, make sure you are testing with a group that has fines set to Day with a round number for the fine rate (i.e., \$10.00).

2. In Media Scheduling

a. Create a new booking that will use the settings in Media SysAdmin, charge it, and let it go overdue by more than a day.

b. Discharge the booking.

3. Run circjob 12.

4. Open circulation and check the patron record. The fine levied will not be a multiple of \$10.00 (or whatever fine rate you chose in Media SysAdmin).

### Example:

a. In Media SysAdmin, a fine rate of \$10/day is set.

b. Booking is charged and due at 10:30 a.m.

c. Booking is discharged at 2:34 p.m. the following day.

d. Expected fine: \$10.00

e. Actual fine: \$11.69

### Resolution:

Fixed in the media server for 8.1.0.
