

Timeout for staff logins

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 19.01
-

Description:

Is there any way to set a timeout for staff logins on the Aleph client?

Resolution:

Aleph makes no provision for timeout of pc sessions, in the sense of dropping the connection of the pc to the server. That would be an enhancement request.

Notes:

The PC_SERVER_TIMEOUT variable of the pc_server_defaults file is used to determine the max time in seconds for which the server attempts to handle a single transaction.

There's a PC_IDLE_CONNECTION_TIMEOUT in the \$aleph_proc/pc_server file, but it also does not relate to the dropping of the pc session.
