## acq-24: "Order Number 2 is invalid, missing, or already exists"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

Error pops up in attempting to submit acq-24 ("Acquisitions - General ADM and Orders Creation") in xxx50 GUI Services:  
"Order Number 2 is invalid, missing, or already exists."

### Cause:

Empty xxx50 z68 and z79 tables.

### Resolution:

"Prime" the z68 and z79 by creating an order in the xxx50 GUI before attempting to submit the acq-24 service.

---

## Additional Information

This message is "5001" in `./error_eng/p_acq_24`:

5001 0000 L Order Number 2 is invalid, missing or already exists.

It is issued by the `./butil/b_acq_24_check_param` program. The program checks the z79 (Order index) table. It seems that it doesn't properly handle an empty z79 table.
