
Select, Save/Mail, Add to My e-Shelf buttons missing from Results screen

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

The results of a Words-based search (such as "WIN" / Instructor) display OK, but there are no buttons for Select, Save/Mail, Add to My e-Shelf, etc., in the Results screen.

Cause:

These buttons are in the "short-include-buttons-xxxnn" screens. The `./www_f_eng/short-2-head-xxx30` screen lacks the "`<include> short-include-buttons`" line.

Resolution:

1. Add the "`<include> short-include-buttons`" line to the `short-2-head-xxx30` screen
2. Restart the `www_server`

Additional Information

The following screens have an include for `short-include-buttons-xxxnn`:

```
> grep short-include-buttons *
short-1-head:<include>short-include-buttons
short-1-head-xxx01:<include>short-include-buttons
short-1-head-xxx30:<include>short-include-buttons
...
short-2-head:<include>short-include-buttons
short-2-head-xxx01:<include>short-include-buttons
short-2-head-usm30:<include>short-include-buttons
short-4-head:<include>short-include-buttons
```

Though `short-2-head-xxx01` and `short-2-head-usm30` include "short-include-buttons", `short-2-head-xxx30` does not. (The `$alephe_tab/tab_base.lng`, col. 4, specifies that the `-xxx30` suffix should be searched first, then `xxx01`, then `usm30`.)

Here's what `short-2-head-xxx01` looks like:

```
<!-- filename: short-2-head-xxx01 -->
<html>
<head>
<title>&f-base - Search Results</title>

<include>meta-tags
<include>include-window
```

```
<include>submit-form-include
<include>short-select-include
</head>
```

```
<body topmargin="0"
onload="window.focus();">
```

```
<include>head-1
<include>find-include-buttons
```

```
<include>short-include-buttons <----- line missing from short-2-head-xxx30
```

```
<include>short-include-2
```

```
<end short-2-head-xxx01 >
```
