## Changes done in tab05.Ing don't appear constantly in the client display

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

After modifying ./xxx01/tab/tab01.Ing (Captions for links between records using sub-fields in the LKR field (\$\$n & \$\$m)) and restarting the PC server the modification appears in the GUI shortly when changing a record accordingly but vanishes when you look at the record again.

?

### Cause:

Daemon ue\_01 restart necessary

### Resolution:

Restarting of daemon ue\_01 is required after modifying ./xxx01/tab/tab05.Ing, also restarting PC server.

?

---

## Additional Information

When you make a change to the record with the LKR field, the PC server makes the appropriate changes of the caption. In parallel, a record is sent to z07 to perform the indexing of the change.

When the ue\_01 is not restarted it does not hold the new tab05.Ing data and when it processes the records from z07 the caption prefix disappears from z103 table and as a result from the GUI Show pane.
