
holdingsInfo.page settings not applied

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7.1.0
-

Problem Symptoms:

* Changes to some webvoyage.properties settings not impacting display in WebVoyage. For example:

holdingsInfo.page.heading=Record View

holdingsInfo.page.label=Bibliographic Details

Cause:

This behavior is caused by Known Issue 16384-20465.

Resolution:

Issue 16384-20465 is currently in Development.

Additional Information

Replication steps:

1. Open WebVoyage and search.
2. Display a record from title list in one of your skins.
3. Note the page and section headings.
4. In same skin on server, edit the value for holdingsInfo.page.heading= ; i.e., holdingsInfo.page.heading=This is my record view.
5. Refresh the display in WebVoyage.
6. Nothing has changed.

Workaround: None.
