
Error when logging into xxx01 library

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 18.01

Problem Symptoms:

- * New library environment created with libraries xxx01 and xxx50
- * When connecting to the library the following error message is displayed
"c0180 6 and no access to library"
- * The library is not locked (See util c/4 Library lock status)
- * When clicking 'ok', the work can be continued

Cause:

The file `./xxx50/tab/path_convert` refers to files that are redirected to a different place

Resolution:

- * Change file `./xxx50/tab/path_convert` to point to the correct file (see additional information for detailed instructions)
- * Restart the relevant servers (e.g. PC Server with util w/3/3)

Additional Information

Example for file `rep_col.lng` in `$abc50/tab/path_convert`

```
$abc50_dev/abc50/tab/rep_col $abc01_dev/abc01/tab/rep_col
```

Directory `$abc01_dev/abc01/tab` is redirected in `$abc01/tab/path_convert` to `xyz01`

```
$abc01_dev/abc01/tab $xyz01_dev/xyz01/tab
```

This type of re-direction chain is not allowed
Refer to `$xyz01_dev/xyz01/tab` in `abc50` directly

1) Change line in `./abc50/tab/path_convert`

From

```
$abc50_dev/abc50/tab/rep_col $abc01_dev/abc01/tab/rep_col
```

To

```
$abc50_dev/abc50/tab/rep_col $xyz01_dev/xyz01/tab/rep_col
```

2) Restart the relevant servers (e.g. PC Server with util w/3/3)
