

## My Account displays Select All multiple times.

- **Product:** Voyager
  - **Product Version:** 7.2.4; 9.1.0
- 

### Symptoms

- Patron has items checked out from multiple databases (i.e., Universal Borrowing (UB), items checked out from home database as well as UB partner databases)
- "Select All" checkbox appears once for EACH database.

### Defect Status

Issue VYG-4601 is resolved for Voyager 9.1.0 and higher.

### Replication steps

1. In the home db's Circulation client, find a patron in one database that is UB eligible for other databases.
  2. Charge an item to this patron in the home db.
  3. Log into Circ at a remote db and charge an item to this patron.
  4. In the home db's WebVoyage, log into My Account as the patron.
  5. Note that the Select All check box appears twice at the top and bottom of the Charged Items list.
  6. Now log into a 3rd database's Circulation and charge another item to the patron.
  7. Back in the home db's WebVoyage, navigate to the My Account page again.
  8. Note that the Select All check box now appears 3 times along the top and bottom of the Charged Items list.
  9. The Select All check box appears once for each database that the patron has items charged from.
