
UPGRADE: password expire set to ##, barring operator login

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.2
-

Problem Symptoms:

* After upgrade to post-8.2.0 version, get "Invalid login - Access denied" when attempting to log into clients.

Cause:

This behavior is the result of Issue VYG-1890.

Resolution:

Issue VYG-1890 is resolved for Voyager 9.1.0 and higher.

If you have upgraded and are experiencing this issue, please open a Case via the Support Portal for assistance.

Additional Information

If password expiration set in pre-8.2.0 version, value from MISCELLANEOUS.OPER_EXPIRE_DAYS maps ## into the CONTROL_VALUE field for CONTROL_NAME passwordMaximumAge in the CONTROL_TABLE.

is invalid ? only 0 ? 999 are valid values for this field. Operators are not able to log into clients after upgrade.
