
AIK: license: no way to save and exit.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

In trying to create a v21 instance using the v21 AIK ikit_menu:

5. Aleph software installation and configuration

3. Update license

OK 1. Extract Aleph Base

OK 2. Aleph software configuration

- 3. Update license

* 4. Install Service Pack

- 5. Relocate alephe directory

- 6. Update auto startup/shutdown script

Enter key (q to quit)[q]: 3 <--- Update license

:wq

The ":wq" does not do a save and exit, but is just included as part of the file -- and there is no way to exit.

Cause:

"Insert" was on ; failure to get out of Insert mode.

Resolution:

Press the Insert key (to toggle out of Insert mode) before doing ":wq".

Additional Information

Details of Update license procedure:

Updating Aleph license

A vi editor will open,

Please paste the license you received , save and exit

press enter when ready
